SMTA2 with vaccine & antiviral manufacturers

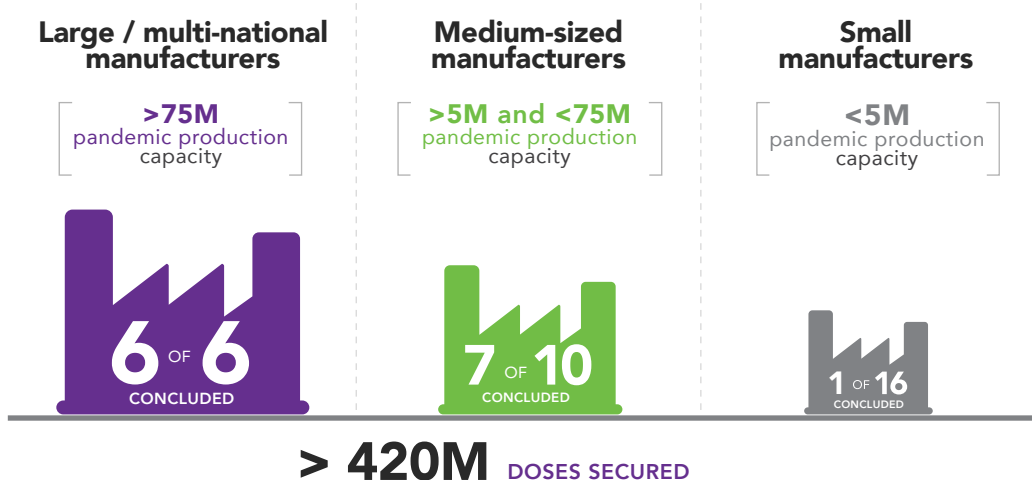

SMTA2 NEGOTIATING STRATEGY AND ACHIEVEMENTS

Through the **14 SMTA2s signed to date**, WHO has secured approximately 420 million doses of pandemic vaccine that it will be able to send to countries in need at the time of the next pandemic. This represents four times the amount of vaccine the Organization had access to during the 2009 pandemic. In addition, WHO will have access to 10 million treatment courses of antivirals.

VACCINE MANUFACTURERS AT-A-GLANCE

This milestone was achieved through WHO's strategic approach to focus on concluding agreements with the largest influenza vaccine manufacturers first. These manufacturers were targeted not only for their size but also because they have export experience and prequalified products, so when pandemic vaccine production begins, they will be able to supply vaccine the most rapidly to WHO. All vaccines and other pandemic products must be prequalified in order to be supplied to a UN agency such as WHO.

More information about the WHO Prequalification Program:
<http://www.who.int/mediacentre/factsheets/fs278/en/>

This strategy has been successful, and to date WHO has concluded an SMTA2 with all of the large multinational companies, which includes 6 of the 7 companies with a prequalified influenza vaccine.

NEXT STEPS

WHO will continue to conclude SMTA2s with all remaining influenza vaccine manufacturers.

Commitments to date

COMPANY	COMMITMENTS							
	Vaccine donation*	Vaccine reservation*	Antiviral donation	Antiviral reservation	Technology transfer to developing countries	Technology transfer to WHO	Gap Grantee	Pre-qualified Vaccine
