ALERT

**RECALL OF PED-EL® (KABIVITRUM)  
NUTRITIVE SOLUTION**

The Company has instituted a recall of PED-EL® 20 ml vials, a solution containing electrolytes, trace elements and glucose, indicated for intravenous nutrition of neonates and infants (batches 54150-01 and 54150-02), as a precautionary measure because the rubber bungs on a number of vials appeared to be misshapen, indicating that seals may be defective.

Recipients of these batches, which have been distributed in the UK, are requested to return all stocks direct to their supplier.

Products from batch no. 54150-53 which have been sent to other countries will not be recalled.
