

**PERUVIAN NATIONAL REPORT
21th INTERNATIONAL ADVISORY COMMITTEE MEETING
Brussels, Belgium, 1-3 June 2016**

I. RESEARCH ACTIVITIES

The Ministry of Transports and Communications has continued its nationwide program on NIR measurements including the capital city Lima and other cities located in 24 regions accumulating nearly 7000 places.

II. NEW POLICIES AND LEGISLATIONS

There is no new legislation or policy established the last year.

III. PUBLIC INFORMATION ACTIVITIES

The Ministry of Transports and Communications, several regional and local governments and the University of San Marcos had been conducting several conferences on NIR including 11 main fora in Lima and some Peruvian cities and towns in order to disseminate the status on NIR research and regulation in Peru.

IV. INFORMATION TOOLS

Through the web sites of:

- National University of Engineering, Peruvian National Institute for Research and Training in Telecommunications (INICTEL-UNI),
<http://rni.inictel-uni.edu.pe>
- Ministry of Transports and Communications (MTC)
<http://antenasysalud.pe> and <http://antenasbuenaonda.pe/>

There was also a multimedia campaign conducted by the MTC including TV, radio, newspaper, internet and social networks with the slogan antenas buena onda (friendly antennas) which was very successful.
