WHOCC FOR HEALTH IN HOUSING
2019-2020 EMF ANNUAL REPORT**

Title: Scientific Research on non-ionizing radiation in public settings from Environmental Health focus.

1. After testing research design, field measurements on ELF and MW began at sidewalks in the Havana street network and squares. Aim is to point out a city mapping of EMF intensity nearby ground level. (FIELD MEASUREMENTS)
2. Data assessment on regard proposing some guidelines for this two EMF items under Precautionary Principle at Havana city remain in progress.
3. Cross sectional study on global cardiovascular disease risk related to urban population and possible linkage to ELF exposure around an electric power generation site. (Work in Progress -case-control study-). ELF measurements and possible population effects).
4. Exploring possible linkages between skin cancer incidence rate and some demographic and environmental factors in Cuba. (paper publication proposal)
