

NORWAY

Report on EMF activities June 2014 - May 2015

General research activities in your country related to EMF health

No research has been performed in Norway during the period.

New policies and legislations regarding EMF exposure

Norway has not performed any new policies or legislations during 2014.

Areas of public concern and national responses

Except for a few municipalities in the western part of Norway, the public concern in Norway is limited at the moment. Because of a reduced concern for RF-fields, the main concern is now observed for ELF.

New public information activities

The Norwegian Post and Telecommunication Authority has changed name to Norwegian Communications Authority. They organize annual dialog meetings with participation from telecommunication companies, installers of base stations and authorities.
