Commitment to FP2030
To improve access, quality and utilization of contraceptive services, WHO makes the following commitments:

1. **Promote rights-based family planning, contraception and fertility care...**
   - By producing, disseminating and supporting implementation of evidence-based guidelines
   - For safe, equitable and accessible policies, programmes and services.

2. **Promote programme and service innovation and improvements...**
   - Through clinical, epidemiological and implementation research
   - To help countries scale up and sustain quality rights-based family planning.

3. **Provide technical assistance to countries and conduct capacity building...**
   - To strengthen policies; support successful implementation and scale up of contraceptive programs through...
   - Decreasing barriers to access contraceptives through various mechanisms such as task sharing, service integration and accountability;
   - Supporting innovations such as self-care interventions (including over-the-counter access to regulated contraception through pharmacies and injectable contraception for self-administration) and use of digital technologies;

4. **Facilitate expansion of contraceptive methods...**
   - By providing pre-qualification of contraceptive commodities.
   - In 2017, use of modern contraceptives prevented an estimated 308 million unintended pregnancies
Facilitate meaningful community engagement...

Including women living with HIV, indigenous and other underserved, marginalized populations...

In the development and implementation of normative guidance on contraception and fertility care.

Suitable contraceptive methods and antiretroviral medication could reduce HIV transmission from mothers to newborns by 93% annually.

Through the Adolescent/Youth Technical Assistance Coordination Mechanism, continue to work with FP2030 to...

Support countries improve access to and uptake of contraception by adolescents...

By supporting the development of sound policies and strategies on adolescents, and their effective implementation and monitoring.

23 million adolescents do not have access to modern contraception.

Leverage the IBP Network to engage country, regional and global partners...

44% of all pregnancies worldwide are unintended.

In the promotion of evidence based guidelines and practices around contraception.

Work with partners in assessing family planning services in humanitarian settings...

And support strengthening service delivery through application of the WHO Contraceptive delivery tool for humanitarian settings.

76,000 maternal deaths could be avoided each year thanks to modern contraception.
WHO works towards promoting right based access and quality of services in contraceptives and fertility care to all individuals who want to use them.

**COMMITMENT TYPE**
- Research
- Issue and/or policy advocacy
- Education and training
- Health systems strengthening
- Monitoring and evaluation
- Technical assistance

**GEOGRAPHIC COVERAGE**
- Global
- Regional
- Country: technical assistance to countries

**IMPLEMENTATION TIME FRAME**
30 June 2022 – 28 June 2024

WHO meaningfully involves adolescents in every substantive work using a five point agenda:

- We have an open selection process with a stated bias towards adolescents in the global South
- When we engage an adolescent for a job, we clearly define the tasks and decide with them as to whether they can take it on
- We provide the adolescents we bring on board with the support they need to successfully do what they are engaged for
- We take on board their inputs with respect and without patronizing them, and
- We pay adolescents for their time and fully acknowledge their contributions.

Self-care interventions for contraception and fertility care have been prioritized in guideline in response to the COVID-19 pandemic as part of efforts to maintain essential health services for sexual and reproductive health.
