

Epidemiological Highlights

Week 32 (9-15 Aug 2021)

**World Health
Organization**

Highlights: COVID-19

As of week 32, (9-15 Aug 2021) there are 2,677 confirmed cases of COVID-19 (SARS-CoV-2), 56,109 samples were tested, total positivity rate 4.8%.

This week (week 32), 100 new confirmed cases detected, 1,313 samples were tested, test positivity was 7.6%.

As of this week (week 32)

- Median age of tested and confirmed cases is 11 (0-120) and 22 (0-100) years
- Female among tested and confirmed cases is 54% and 51%
- All 34/34 camps have confirmed cases, the top 6 camps with the number of confirmed cases i.e., C3-164, C2W & C24-156, C15-147 and C17 & C4-144.
- A total of 29 deaths from COVID-19 with the case fatality rate 1.1%
- Cases per million in last 7 days 116.3, change in last 7 days -2%

Highlights: COVID-19

COVID-19 positive cases (n=2,677) by epidemiological week by date of test

Highlights: COVID-19

Highlights: COVID-19

Highlights: COVID-19

Severity of reported cases at presentation (n=2,477)

Did the case report at least 1 co-morbidity (n=2,477)

Source: Go.Data

Highlights: COVID-19 Contact Tracing

- Total 2,477 (out of 2,677) confirmed cases have been investigated by Rapid Investigation and Response Team (*RIRT, a camp wise CT network, composed of RIRT coordinator, Site Mx representation, CT supervisor, currently camp 34 teams are working with 34 supervisors and over 300 volunteers i.e., contact tracer*).
- Contact tracing has been done by CT supervisors with 5,562 contacts registered in the Go.Data for follow up, out of 9,026 contact identified through field investigation by RIRT.
- 3,252 (58%) contacts successfully completed the follow up.
- Two hundred and sixty-seven (8.2%) contacts became tested positive for COVID-19 during the incubation period.

EWARS Reporting Updates

- Total 172 health facilities registered in EWARS
- Only 125/172 weekly reports received on time in week 32
- Sixty-nine (69) alerts were triggered in week 32
- Timeliness of reporting for this week is 73%
- All alerts were reviewed and verified by WHO EWARS team, the number is less than that of previous week (79 in week 31).

Highlights:

- Acute Respiratory Infection (17.1%), Diarrheal Diseases (5.5%) & Unexplained Fever (1.1%) are the diseases with highest proportional morbidity in week 32.
- Suspected SARI death under enhanced Community-based mortality surveillance has been continued since week 28, 2020.
 - One hundred twenty-six (126) suspected SARI deaths have been reported so far and reviewed subsequently by Rapid Investigation and Response Team (RIRT) for COVID-19.
 - Total eleven (11) SARI deaths were considered as death due to probable COVID-19 till date.

Diphtheria

Five (5) suspected diphtheria case was reported in go.data in week 32

A total of 9 296 case-patients were reported since 2017 to till date

- Confirmed = 343
- Probable = 2 803
- Suspected = 6 150

Total case reported in 2021 = 111

- Confirmed = 1
- Probable = 25
- Suspected = 84

Last confirmed case was reported in week 1 (4 January 2021)

In total 47 deaths were reported, last death reported on 25 October 2019.

Diphtheria

Total number of diphtheria case reported in EWARS from 2020-2021 W32

Measles

Total number of Measles case reported in EWARS from 2020- 2021 W32

In week 32, 6 suspected measles cases were reported through weekly reporting make 367 cases in total in 2021. Out of those 263 cases (72%) reported through case-based reporting and samples collected for laboratory confirmation.

Diarrhoeal Disease

Total number of AWD case reported in EWARS from 2018-2021 W32

- A total of 3,651 cases of diarrhoeal diseases reported in EWARS in week 32.
- Among which 2,621 cases (3.9%) reported as acute watery diarrhoea (AWD), remaining 717 (1.1%) and 313 (0.5%) cases as other and bloody diarrhea, respectively out of all types of morbidities.

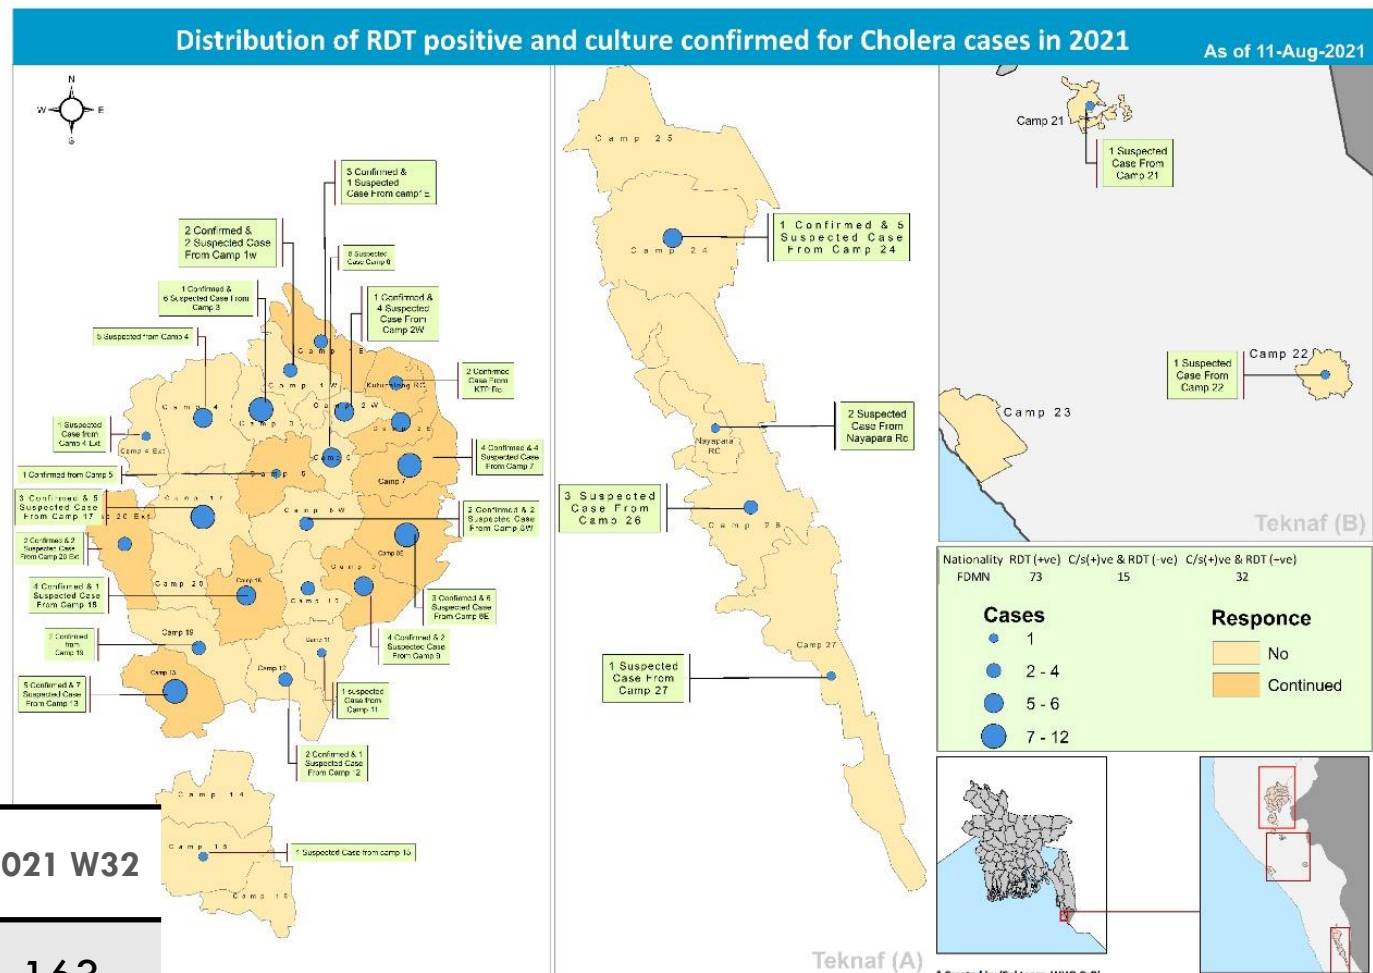

Cholera Surveillance

RDT positive & culture confirmed cholera cases, 2018-21

Cholera Surveillance

- Total one hundred sixty-three (163) Cholera RDT positive/culture cases reported as of W32 2021. Out of those 58 were confirmed by culture, 81 discarded and remaining results 24 yet to be received.
- In 2020, total 28 RDT/Culture positive cases for Cholera detected through sentinel testing. Specifically, 5 became confirmed by culture - 2 from Ukhiya Host, 1 from Teknaf host and 2 from Refugees.

2018 2019 2020 2021 W32

RDT positive/culture confirmed for Cholera 49 258 28 163

Culture confirmed for Cholera 7 184 5* 58

*3 culture confirmed cases were RDT negative in 2020

Community-based Mortality surveillance

In week 32, 27 deaths were recorded -

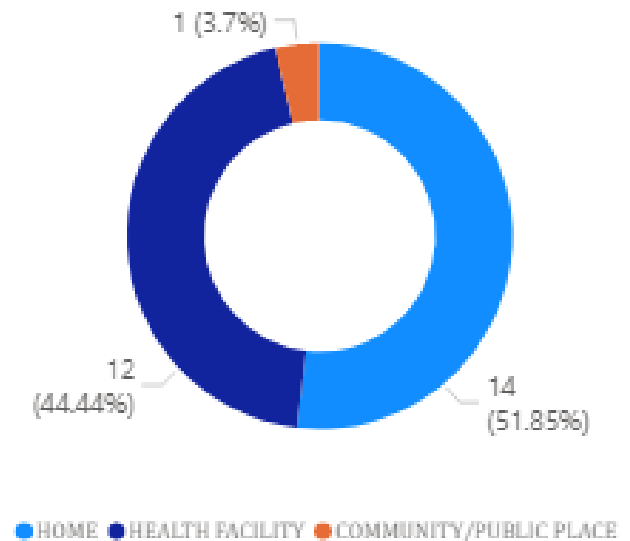

- 74% (n=20) were due to causes classified as “Others”
 - 14% (n=4) as still birth (Born Dead)
 - 4% (n=1) as neonatal death
 - 4% (n=1) as severe acute respiratory infection (SARI)
 - 4% (n=1) as infectious disease
-
- Out of reported deaths, 44.4% occurred in health facilities and 51.8% at homes and 3.7% at community/public place.
 - Partners to report all mortalities into EWARS platform using both case and event-based reporting as applicable.

Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

More information can be found at <http://ewars-project.org>
