

# Epidemiological Highlights

Week 2 (10-16 Jan 2022)

**World Health  
Organization**

# Highlights: COVID-19

As of week 2, (10-16 Jan 2022) there were 3,319 confirmed cases of COVID-19 (SARS-CoV-2), out of 83,207 samples that had been submitted for testing. The total positivity rate now stands at 4.0%.

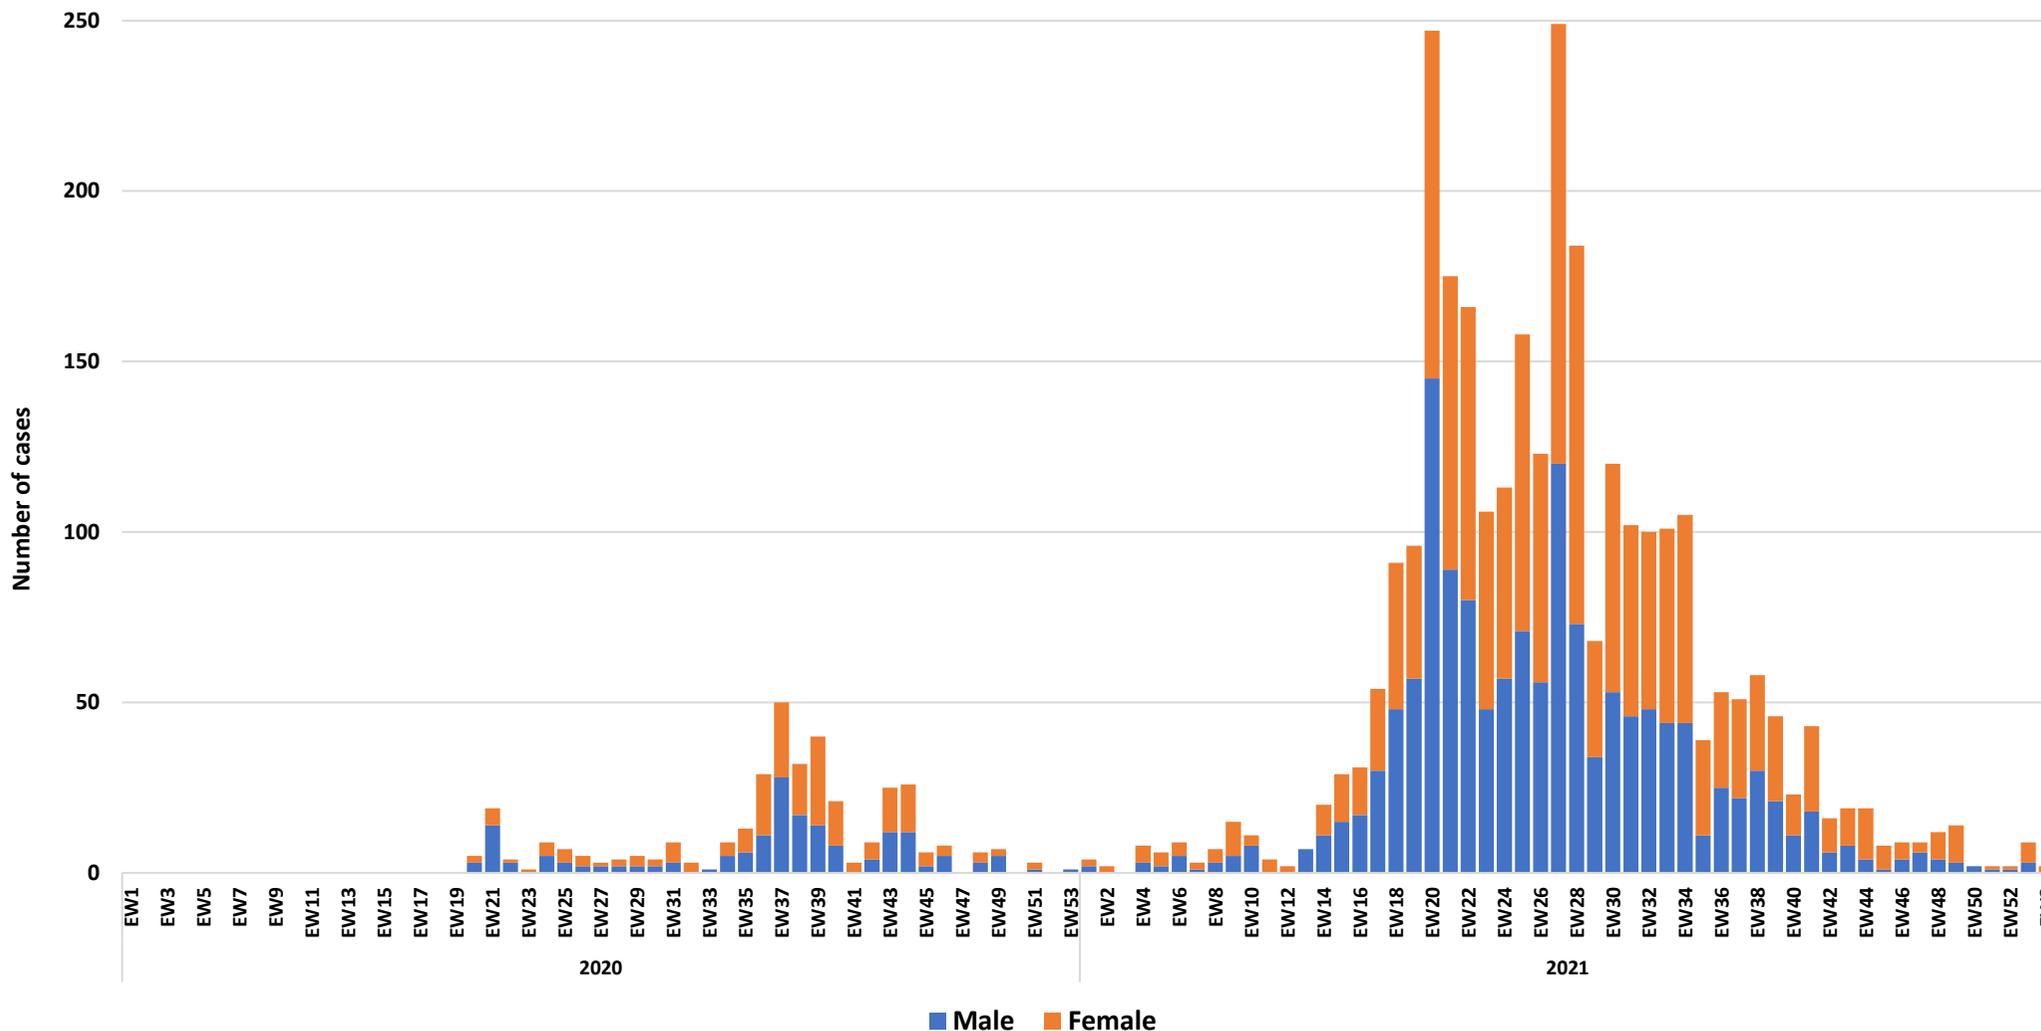

In the reporting week, two (2) new confirmed cases were detected out of 1,225 total samples tested. This translated to a 0.2% Test positivity Rate (TPR) which is a decline from 0.9% reported the previous week.

## As of this week (week 2)

- Median age of tested and confirmed cases were 11 (0-120) and 21 (0-100) years respectively
- Proportion of females among tested and confirmed cases were 54% and 53% respectively
- All the 34 camps, have so far reported confirmed cases since the outbreak began, while the five camps with the highest number of reported cases were; C24-208, C3-202, C17-186, C2W-181, and C21-179.
- No new death was reported in this Epi week hence weekly case fatality ratio remains 0 for the past nine weeks
- Total confirmed COVID-19 deaths so far reported to date stands at 34 with the average case fatality ratio of 1.0%
- The weekly incidence was 2.3 cases/1 million population in this Epi week which is lower in comparison with the previous week.

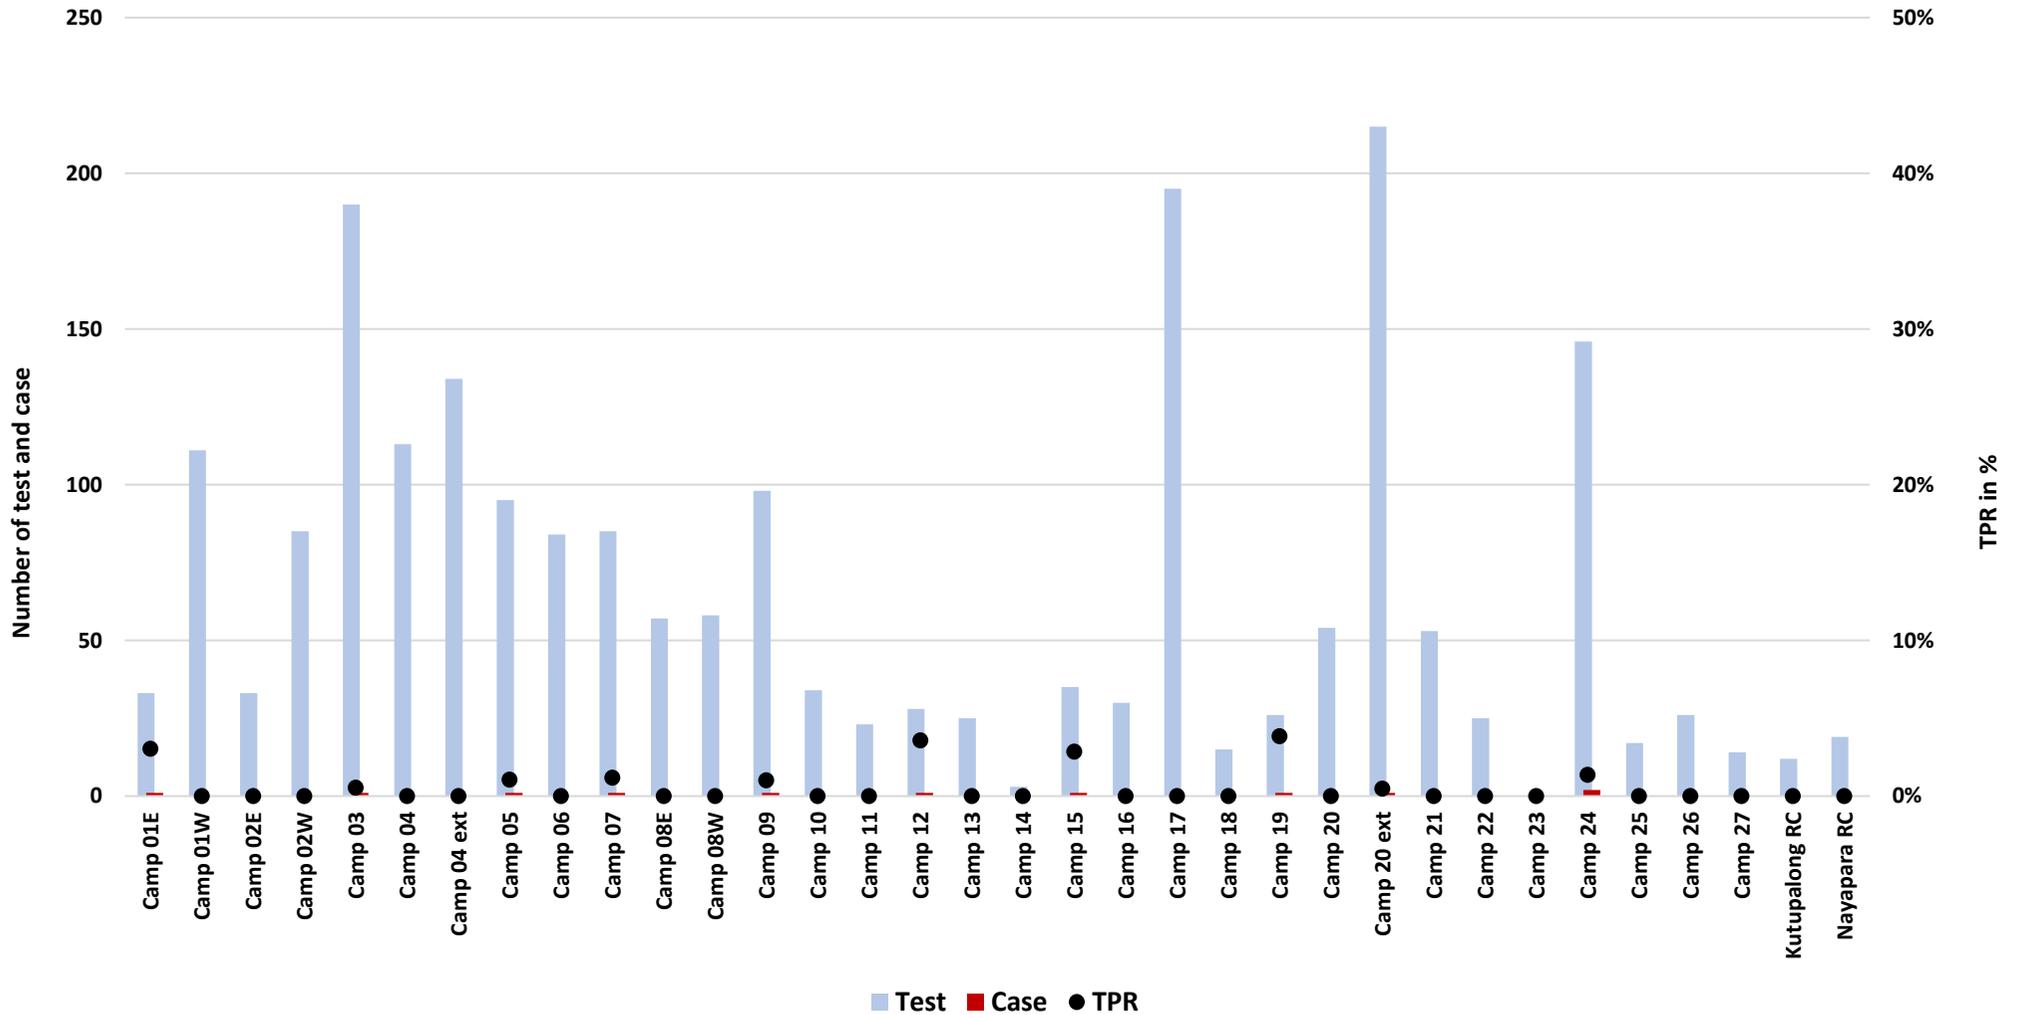

# Highlights: COVID-19

COVID-19 positive cases (n=3,319) by epidemiological week by date of test

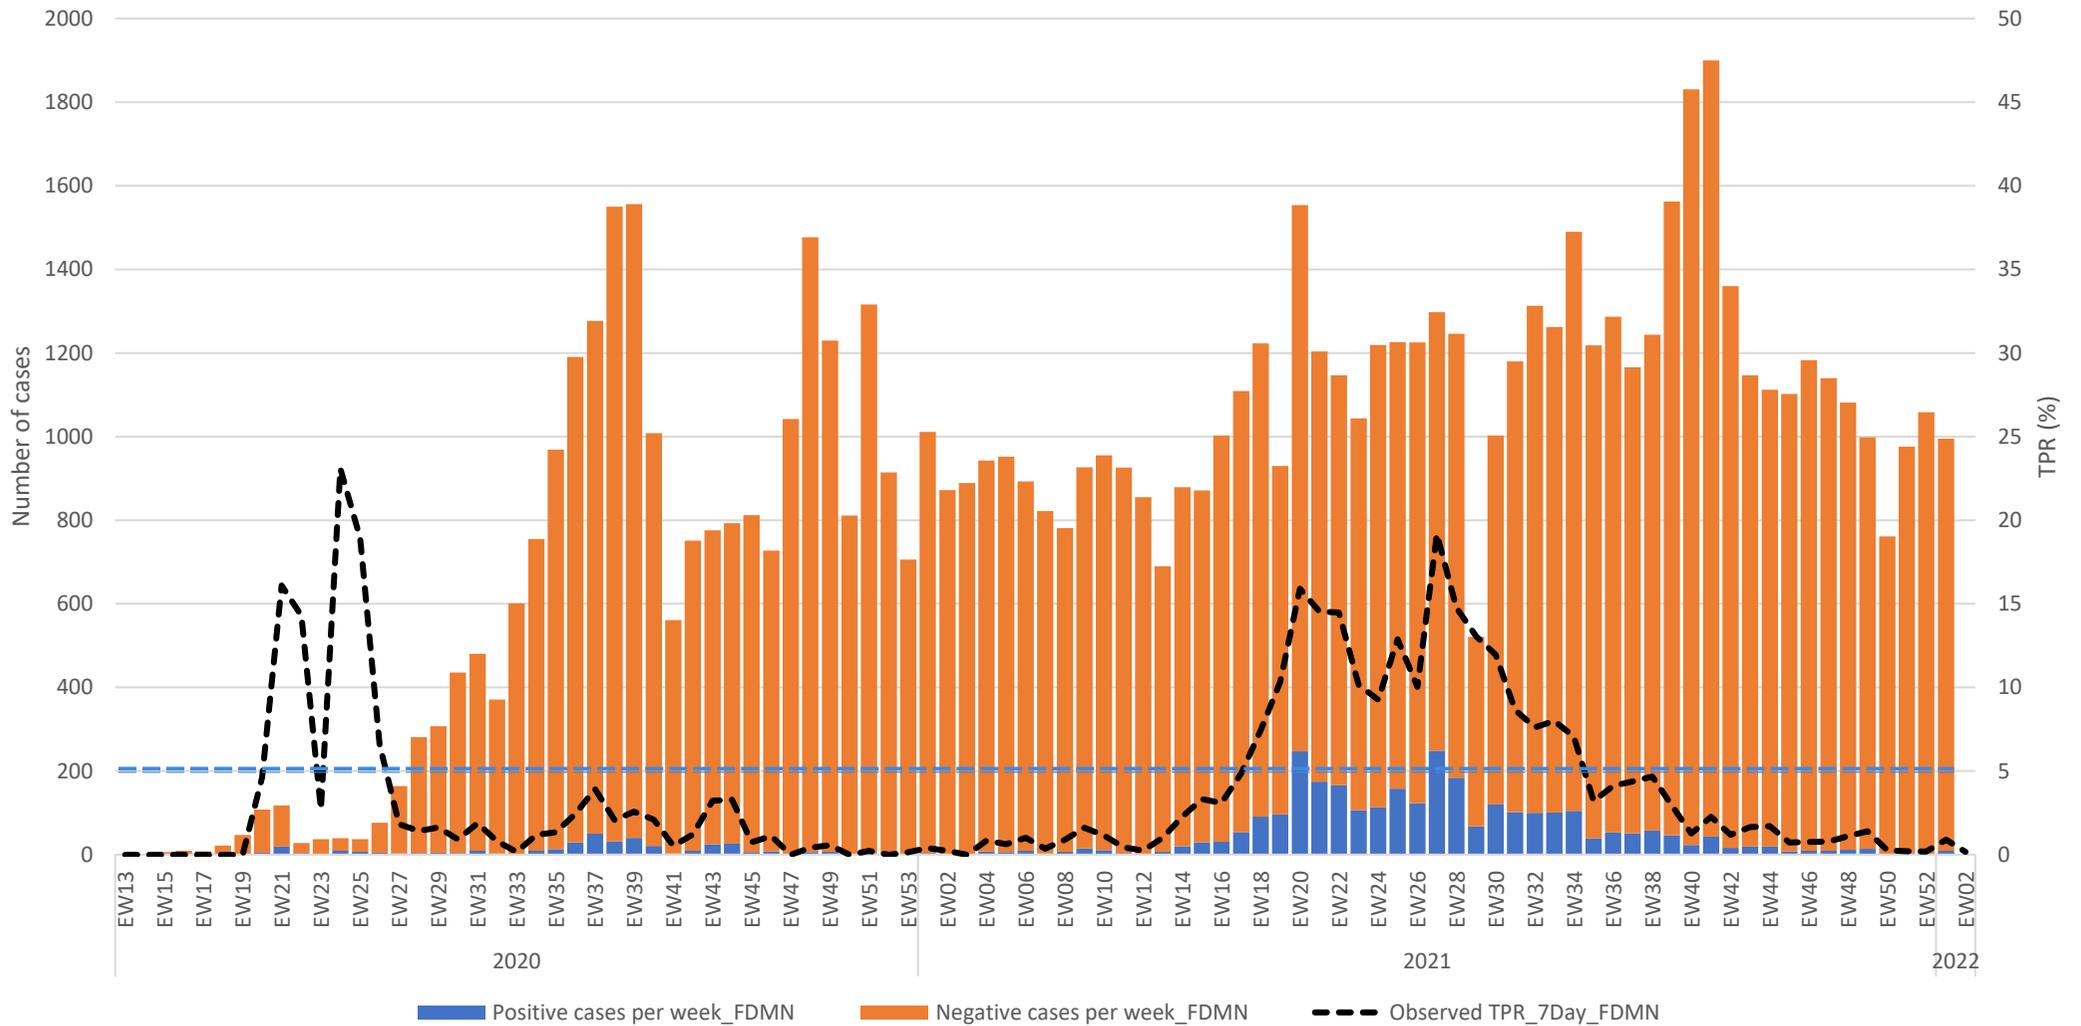

# Highlights: COVID-19

# Highlights: COVID-19

# Highlights: COVID-19

Severity of reported cases at presentation (n=3,166)

Did the case report at least 1 co-morbidity (n=3,166)

Source: Go.Data

# Highlights: COVID-19

- Total 3,166 (out of 3,319) of the confirmed cases have been investigated by the Rapid Investigation and Response Team(RIRTs)
- Contact tracing continues to be undertaken by CT supervisors with 9,429 (84%) contacts registered for follow-up in the Go.Data out of 11,280 total contacts so far identified during the field investigation.
- 7,212 (76%) contacts successfully accomplished the follow-up.
- 321 household contacts tested positive within the incubation period. This translates to 3.4% seroconversion rate based on contacts registered in go.data

Source: Go.Data

# EWARS Reporting Updates

- Currently, a total of 167 health facilities are registered in EWARS
  - Only 150/167 weekly reports were received on time in this reporting week
  - Timeliness of reporting for this week was 90%
  - Eighty-nine (89) alerts were triggered
  - All alerts were reviewed and verified by the WHO EWARS team; the number is less than that of the previous week (95 alerts in week 1, 2022).

# Highlights:

- Acute Respiratory Infections (18.0%), Diarrheal Diseases (4.1%) & Injury and wounds (1.8%) were the diseases and health conditions with the highest proportional morbidity in week 2.
- Monitoring of suspected SARI death under enhanced Community-based mortality surveillance has been continued since week 28, 2020.
- This Epi week, there were two (2) suspected SARI death reported

Year	Suspected SARI death reported	# of Investigation conducted	Reclassified as probable COVID-19
2020	49	47	2
2021	96	89	15
2022	7	7	0

# Diphtheria Surveillance Updates

Two (2) confirmed and 4 suspected diphtheria case were reported in go.data in this Epi week

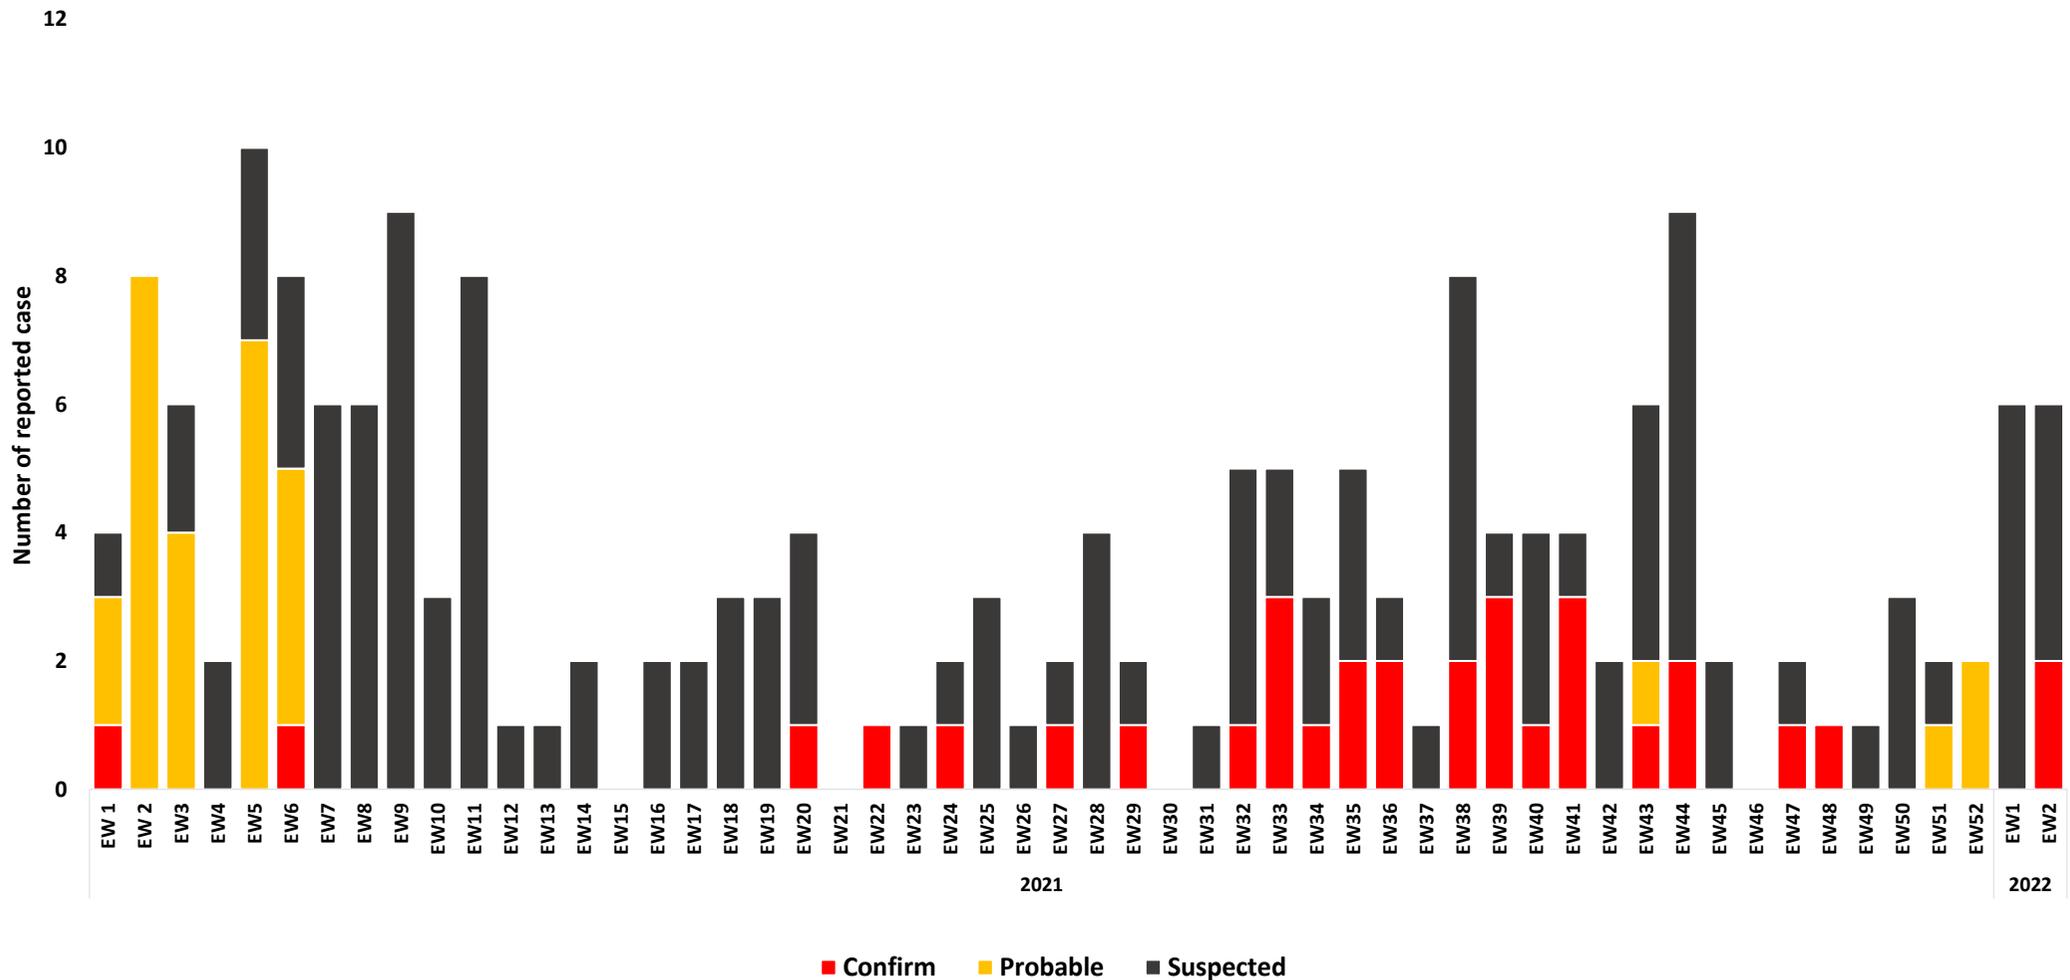

The last confirmed case was reported on 15 January 2022

In total 52 deaths have so far been reported since 2017, the last death reported on 5 November 2021

<b>Classification</b>	<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>
<b>Confirmed</b>	66	226	31	19	30	2
<b>Probable</b>	1154	1555	60	9	29	0
<b>Suspected</b>	1796	3549	523	198	118	10
<b>Death</b>	30	14	3	0	5	0

# Diphtheria Surveillance Updates

Total number of diphtheria case reported in EWARS from 2021- EW2, 2022

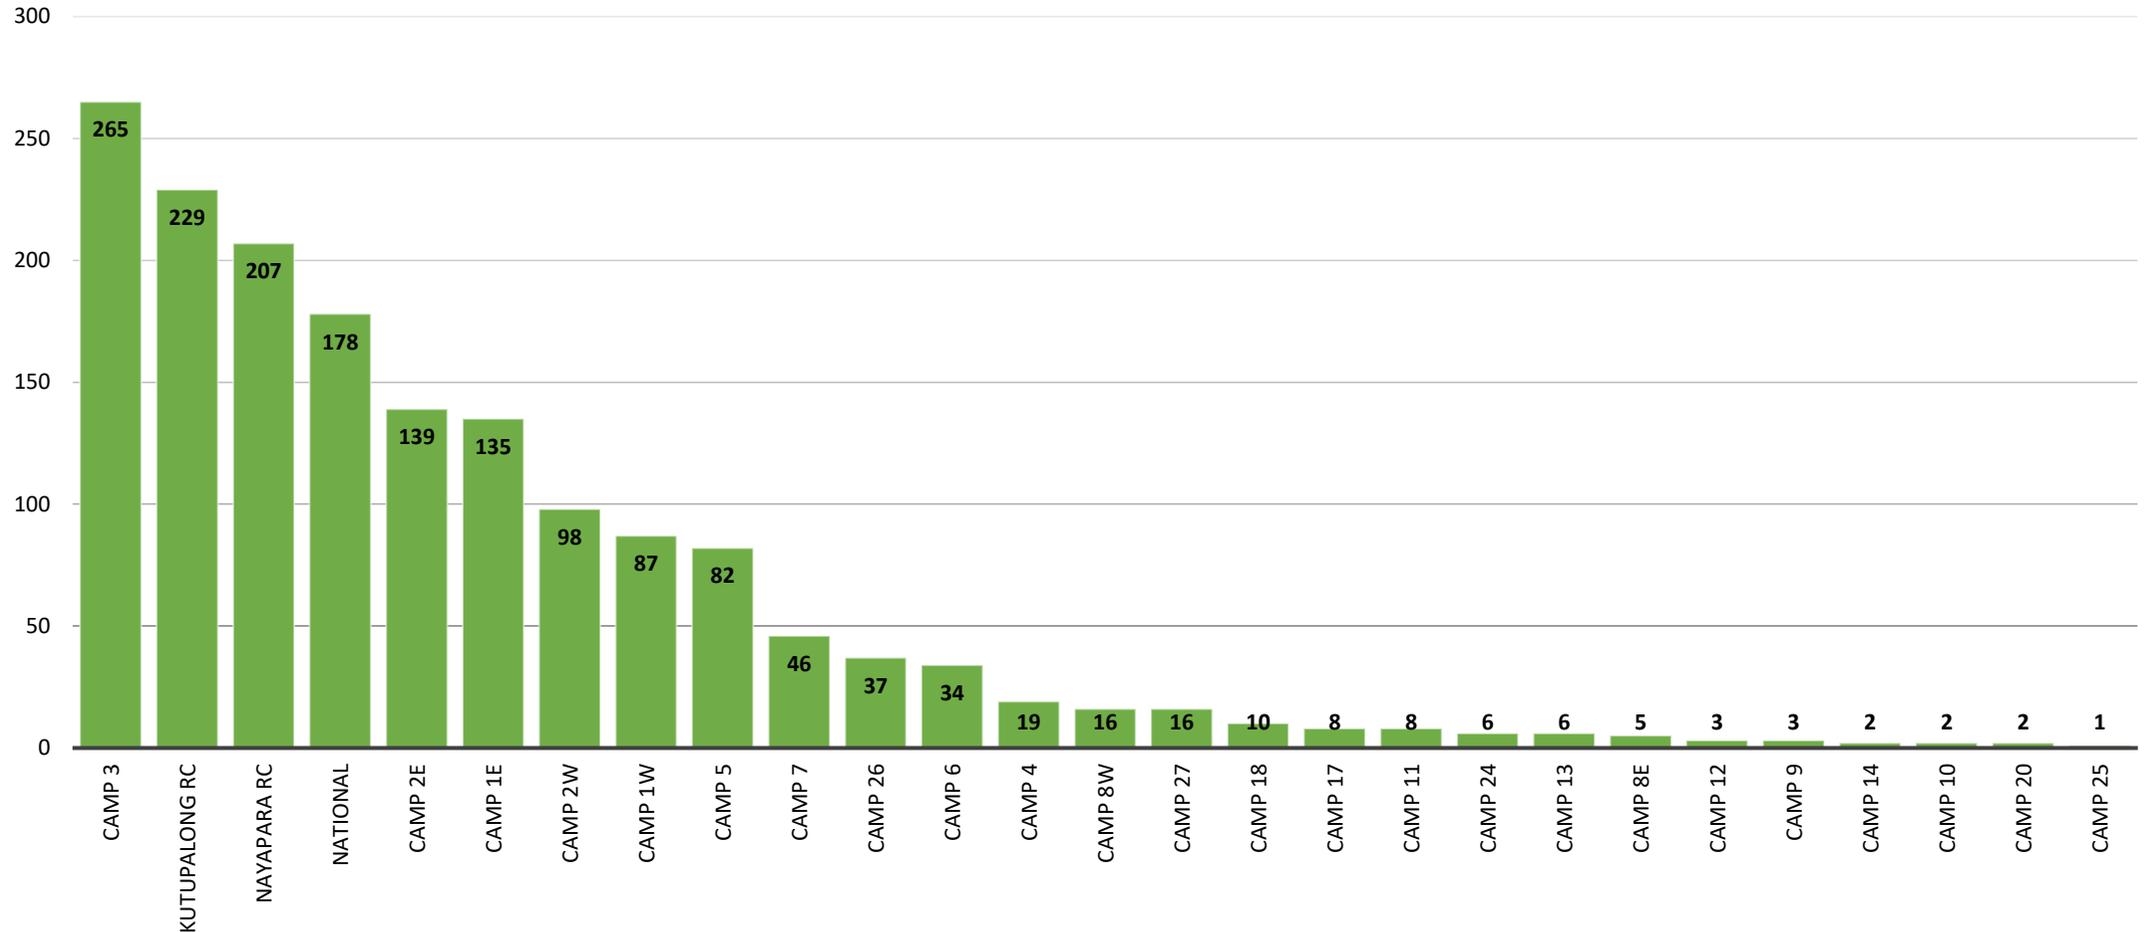

# Dengue cases reported from 2021-2022 Epi, Week 2, 2022

Year	Month/Epi Week	Week/month		Cumulative	
		Confirmed case	Death	Confirmed case	Cumulative Death
2021	Jan-Mar	1	0	1	0
	Apr-Jun	3	0	4	0
	Jul-Sep	6	0	10	0
	Oct-Dec	1,494	3	1,504	3
2022	W1 (3-9 Jan)	88	0	1,592	3
	W2 (11-17 Jan)	53	0	1,645	3

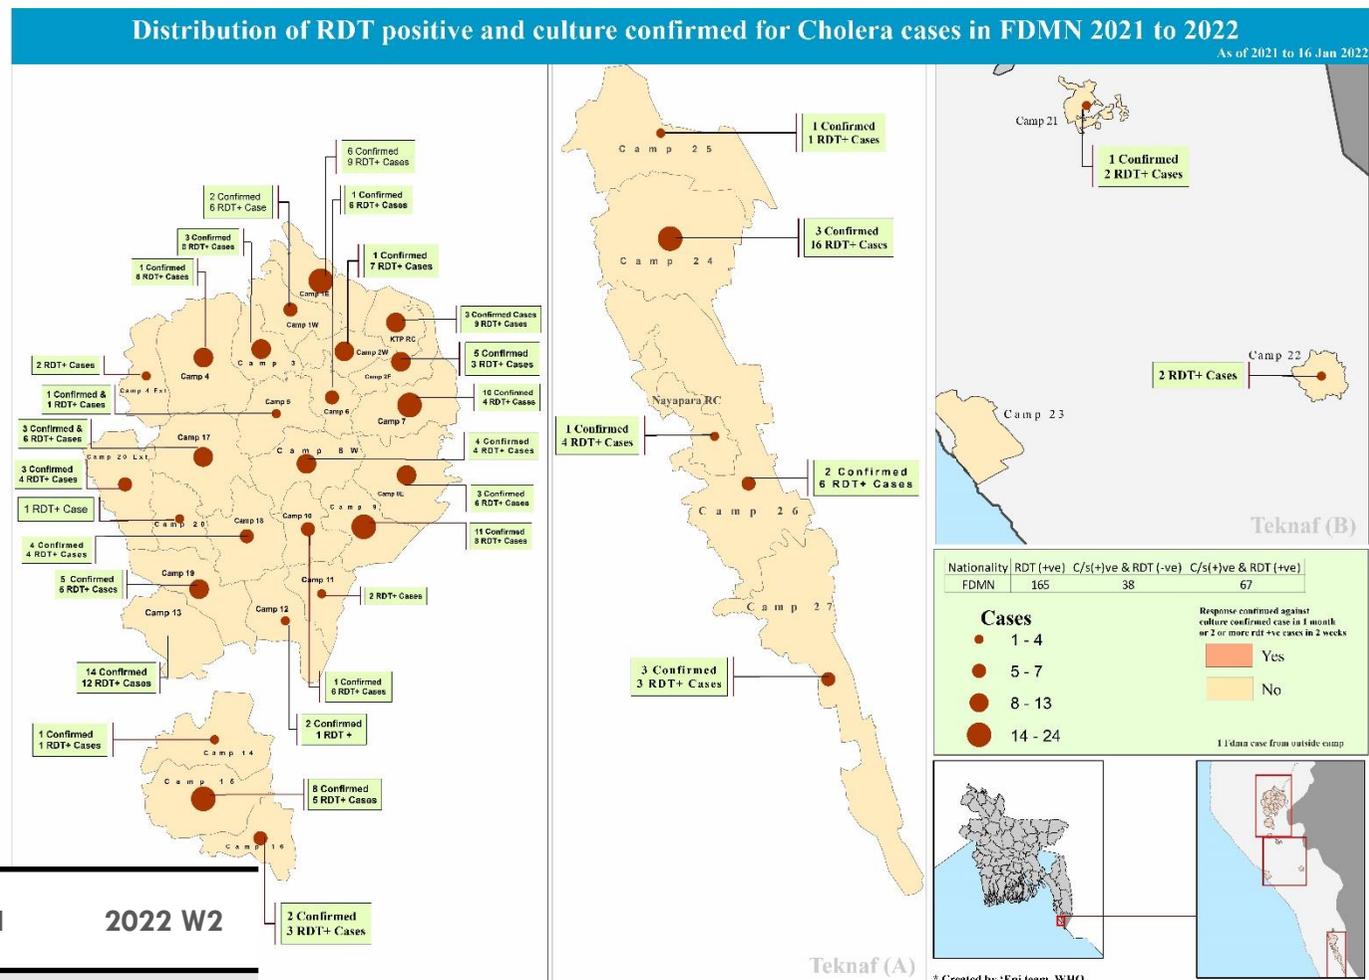

# Distribution of cases from 2021- Epi Week 2, 2022

Geographical distribution of Dengue confirmed cases (n=1,645)

# Cholera/AWD Surveillance, Cox's Bazar District, 2017- Epi Week 2 2022

- In this week, eight (8) RDT positive cases were reported, among samples sent for testing.
- In 2022 total of eleven (11) cholera cases were reported as of W2 2022. Of these 10 were negative and 1 awaiting laboratory confirmation.
- In 2020, a total of 28 RDT/Culture positive cases for Cholera were detected through sentinel testing. Specifically, 5 became confirmed by culture – 2 from Ukhiya Host, 1 from Teknaf host, and 2 from Refugees.

2018    2019    2020    2021    2022 W2

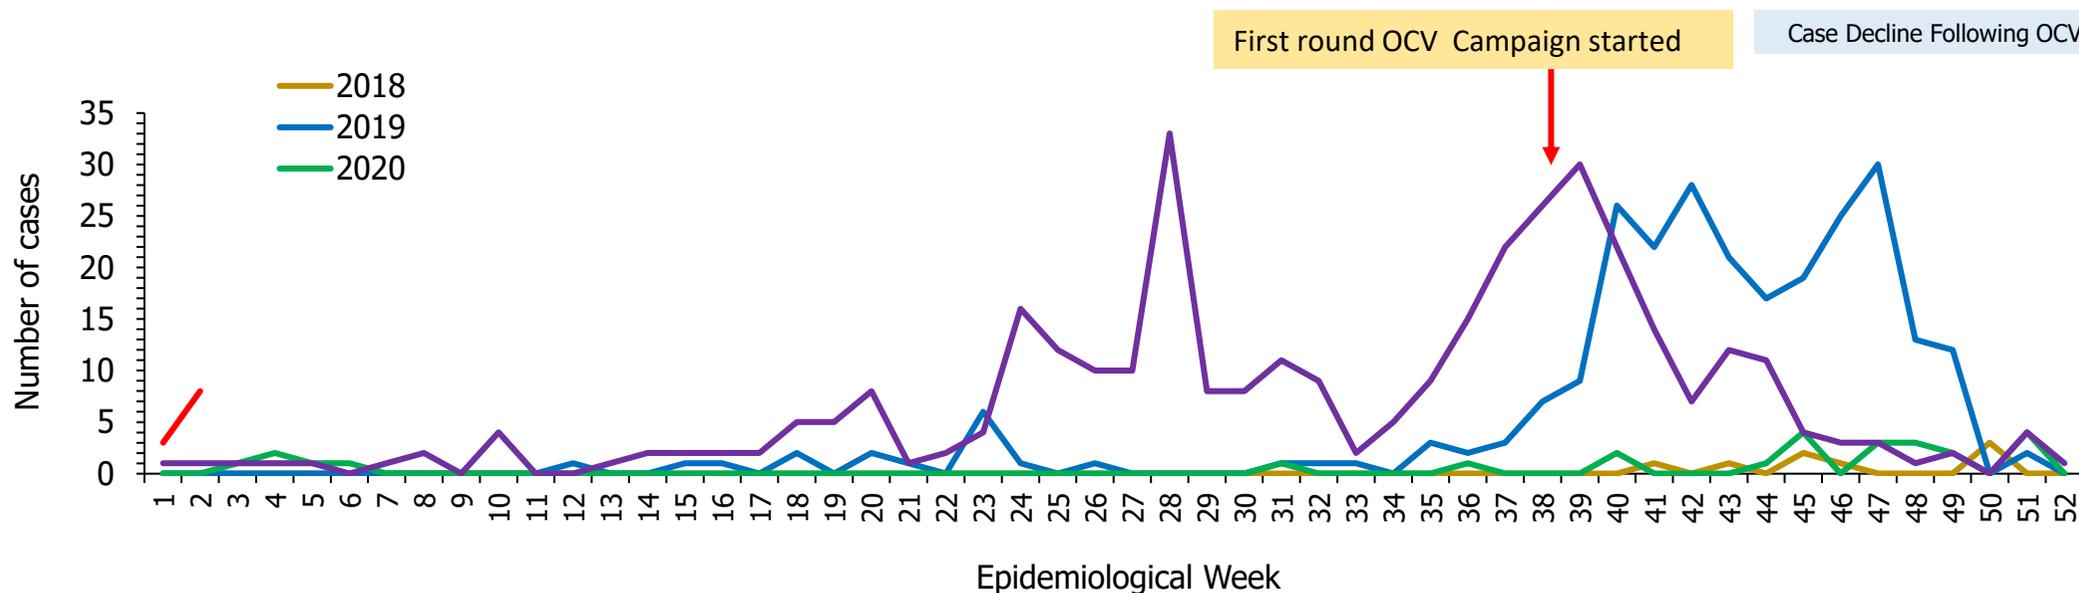

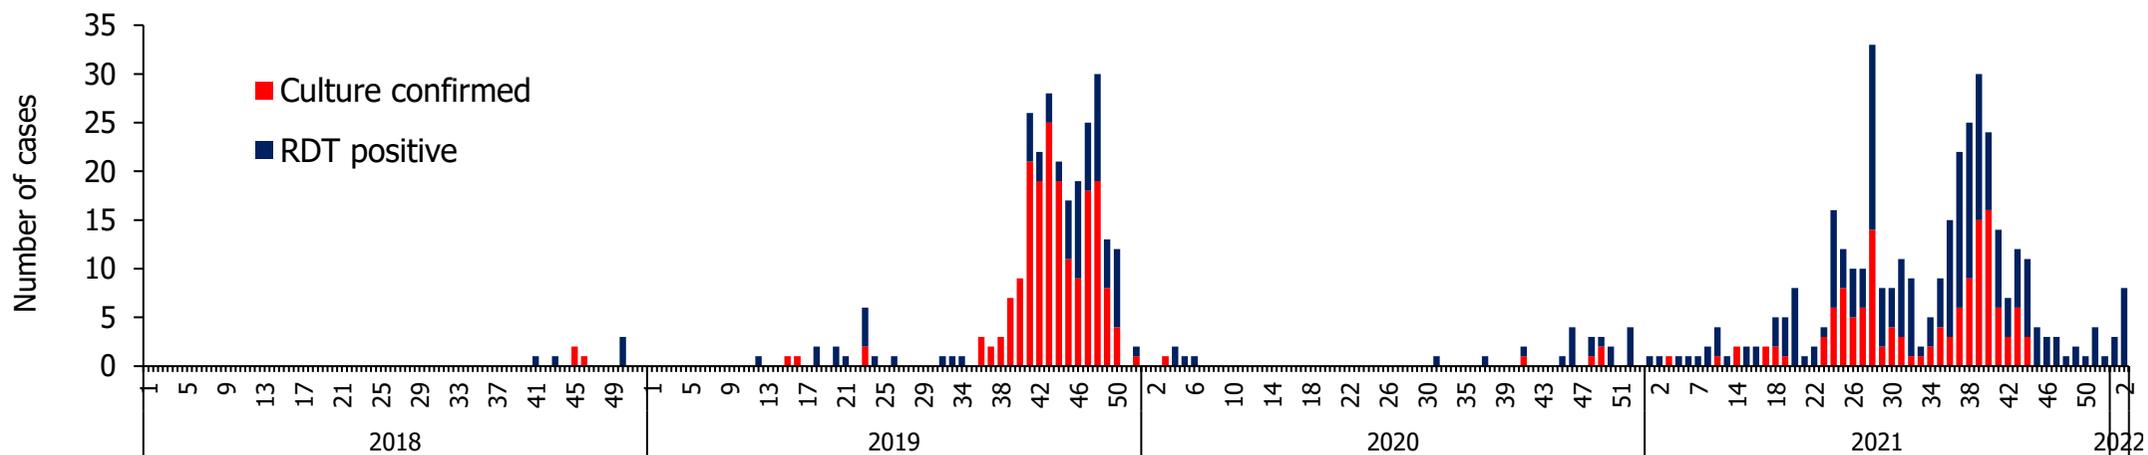

RDT positive/culture confirmed for Cholera

49    258    28    357    11

Culture confirmed for Cholera

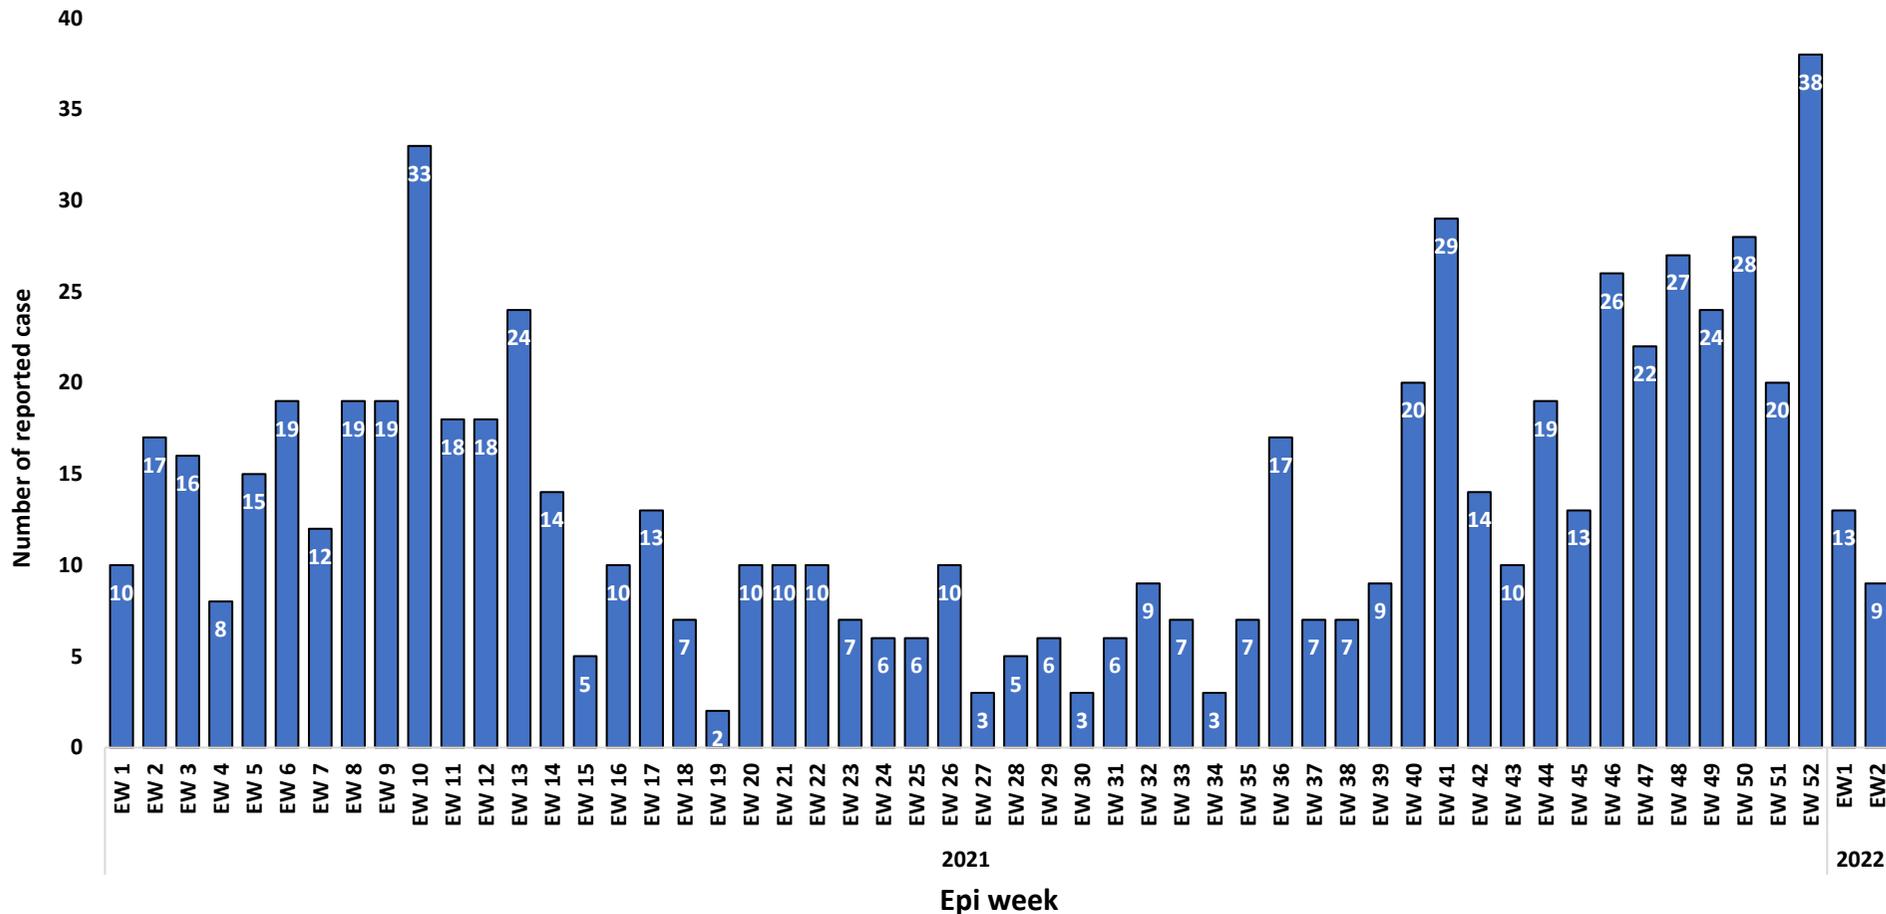

**7    184    5\*    136    0**

# Epidemic curve of cholera, Cox's Bazar District, 2017-Epi Week 2, 2022

# Measles Surveillance Updates

Total number of Measles case reported in EWARS from 2021- W2, 2022

In week 2, 9 suspected measles cases were reported through weekly reporting. This brings the total number of suspected measles cases to 22 reported in 2022.

About 100% (22/22) of the total reported suspected measles cases were reported through case-based reporting and samples collected for laboratory confirmation

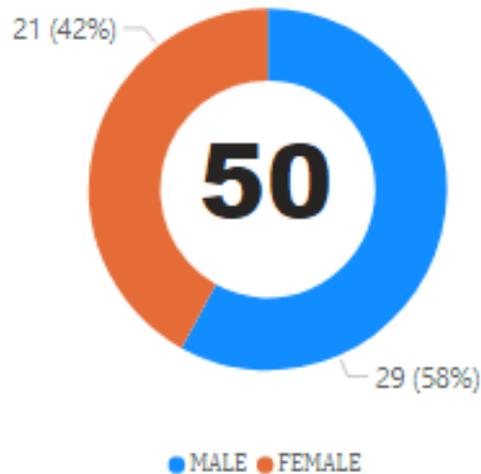

# Community-based Mortality surveillance Updates

Probable Cause of Death	Week 2	In 2022
Still Birth	7 (14%)	10 (11%)
Neonatal Death (<28 days old)	5 (10%)	7 (8%)
Infectious Disease	1 (2%)	2 (2%)
Severe Acute Respiratory Infection (SARI)	--	2 (5%)
Injury	--	--
Maternal Death	2 (4%)	4 (4%)
Acute Malnutrition	--	--
Other	35 (70%)	63 (70%)
<b>Total</b>	<b>50 (100%)</b>	<b>90 (100%)</b>

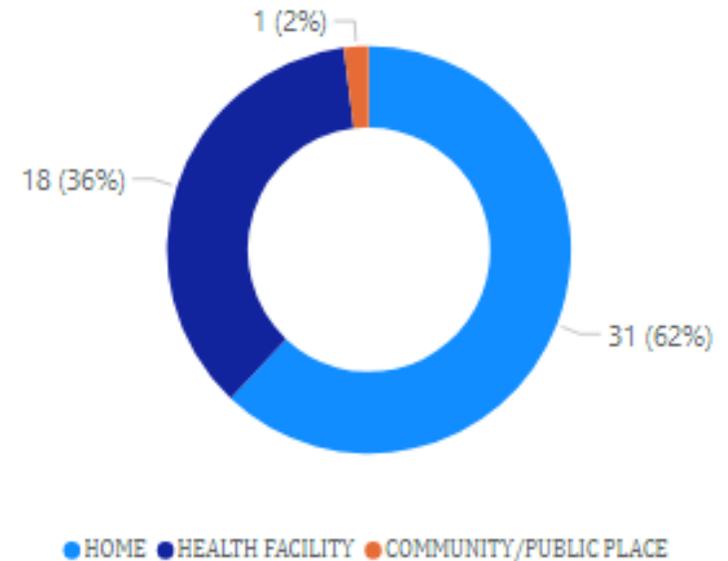

- Partners to report all mortalities into EWARS platform using both case and event-based reporting as applicable.

## Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

More information can be found at <http://ewars-project.org>

Email: khan@who.int

### Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

More information can be found at <http://ewars-project.org>

Sign up for an account with EWARS Bangladesh at <http://bd.ewars.ws>
