# EWARS Reporting Updates

- Currently, a total of 166 health facilities are registered in EWARS
  - Only 143/166 weekly reports were received on time in week 8
  - Timeliness of reporting for this week was 86%
  - Sixty-one (61) alerts were triggered
  - All alerts were reviewed and verified by the WHO EWARS team; the number is less than that of the previous week (65 alerts in week 7, 2022).

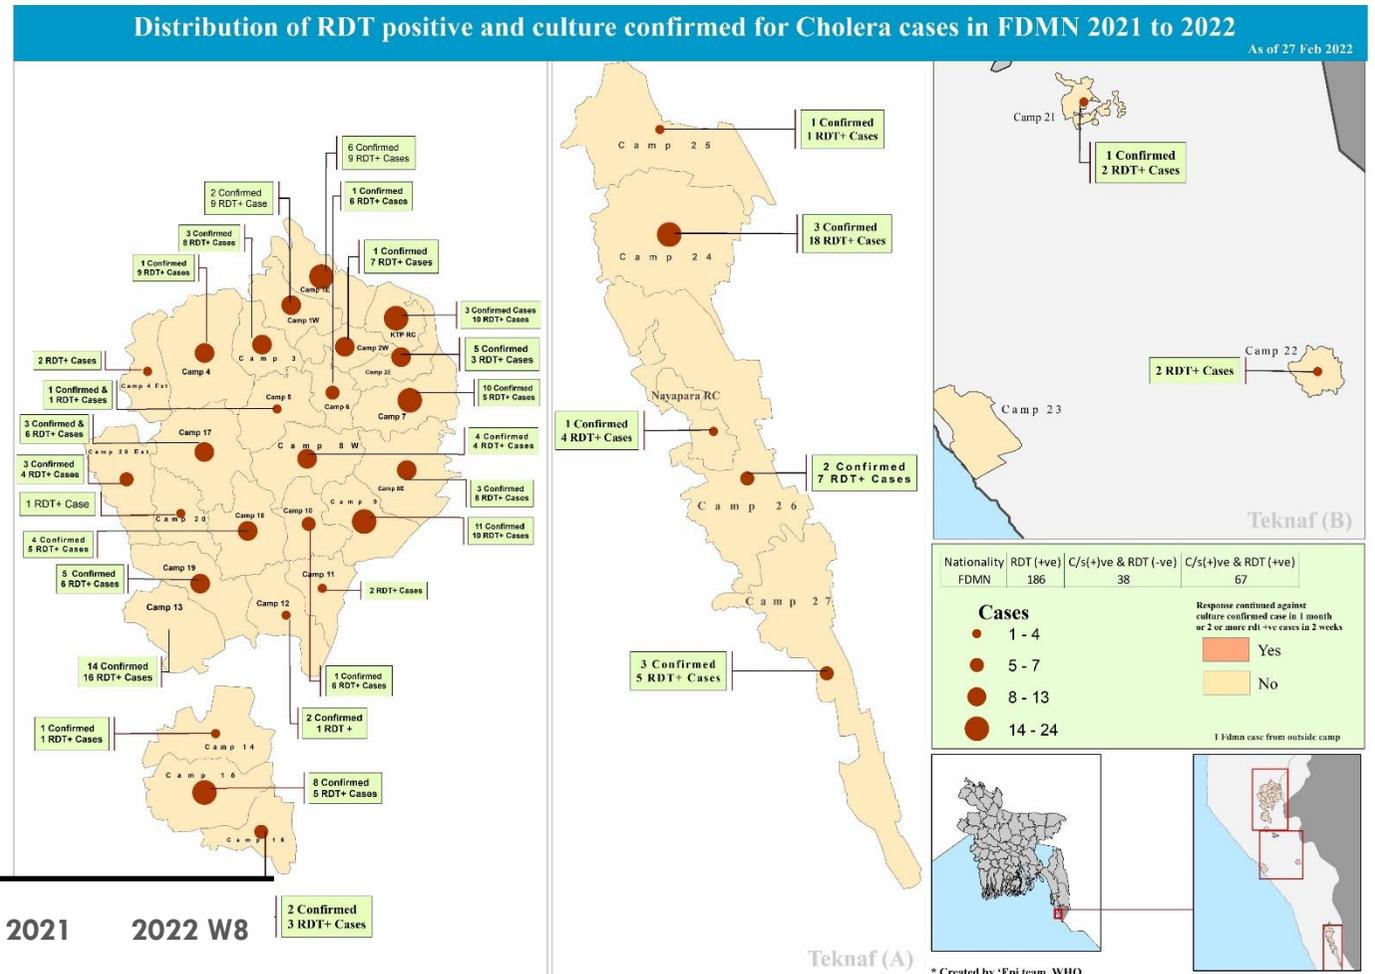

# Highlights: Morbidities and Mortalities

- Acute Respiratory Infections (15.4%), Diarrheal Diseases (3.6%) & Injury and wounds (2.1%) were the diseases and health conditions with the highest proportional morbidity in week 8.
- Monitoring of suspected SARI death under enhanced Community-based mortality surveillance has been continued since week 28, 2020.
- This Epi week, there were Six (6) suspected SARI deaths reported. The detailed update was given below:

Year	Suspected SARI death reported	Reclassified as death due to probable COVID-19
2022	33	5
2021	96	15
2020	49	2

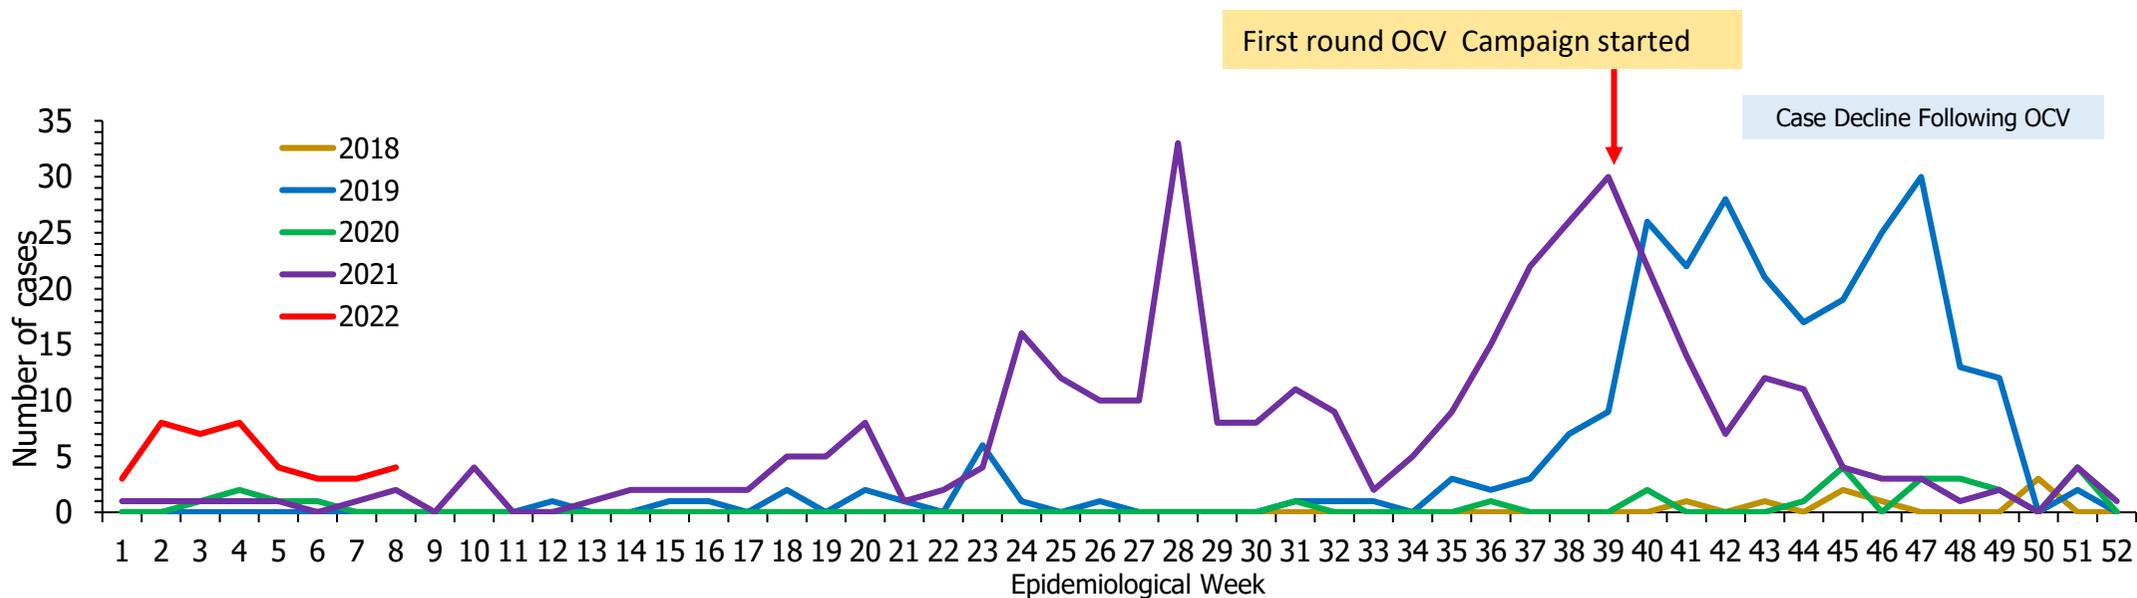

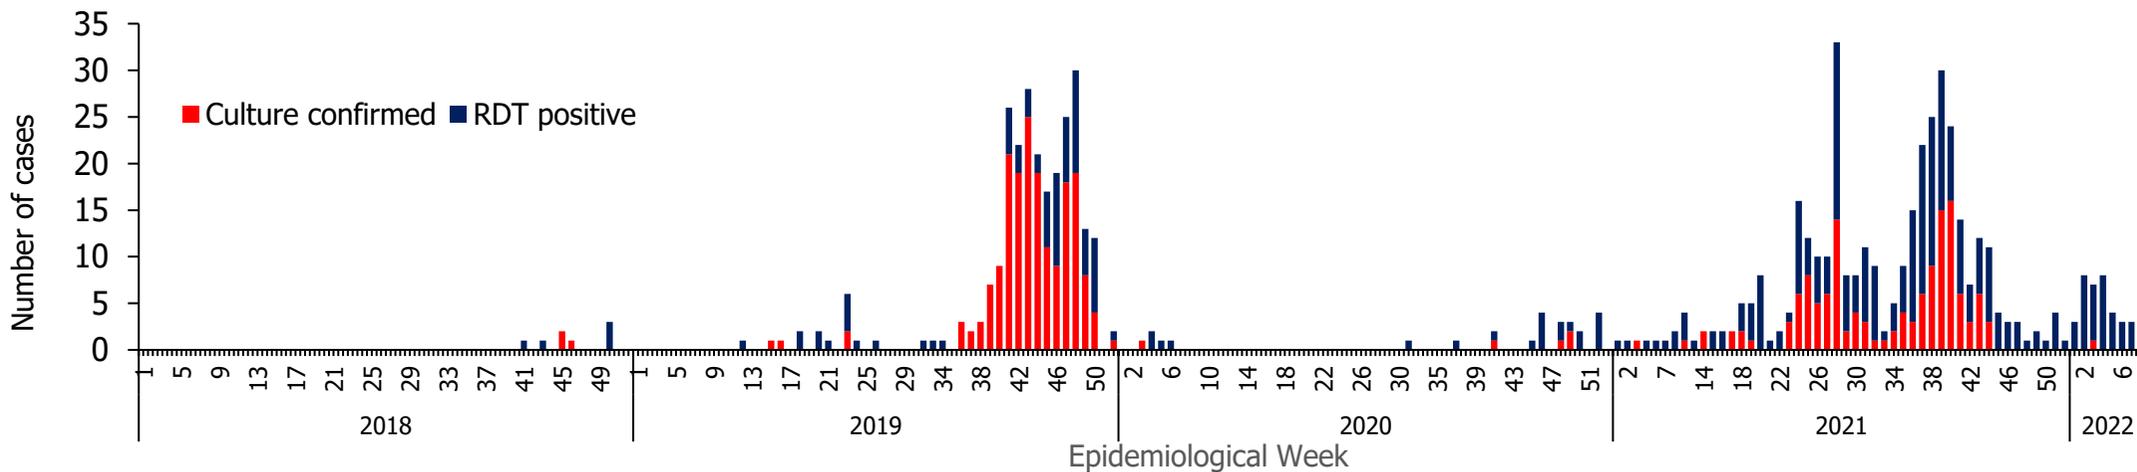

# Cholera/AWD Surveillance Updates

- In this week, three (4) RDT positive cases were reported, among samples sent for testing.
- In 2022 total of forty (40) cholera cases were reported as of W8 2022. Of these 1 was positive 18 were negative and 21 awaiting laboratory confirmation.
- In 2020, a total of 28 RDT/Culture positive cases for Cholera were detected through sentinel testing. Specifically, 5 became confirmed by culture – 2 from Ukhiya Host, 1 from Teknaf host, and 2 from Refugees.

## Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

### Notes

WHO and the Ministry of Health and Family Welfare gratefully acknowledge all partners who have reported the data used in this bulletin.

The data been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.
