we can slow the
spread of
antimicrobial
resistance.**

AMR Multi-Stakeholder Partnership Platform

Creating a movement for change through engaging multiple actors and voices

Global Governance

Global Leaders Group (GLG)

Launched in November 2020

Independent Panel on Evidence for Action Against AMR (IPEA)

ToR submitted to UNSG for endorsement in February 2021

AMR Multi-Stakeholder Partnership Platform

To be launched in November 2021

Who is invited to join the Platform?

Purpose and Expected Results

Purpose

- ✓ To bring stakeholders across the human, animal, plant, and environment interface together, in order to preserve antimicrobials as lifesaving medicines across all sectors

Expected results

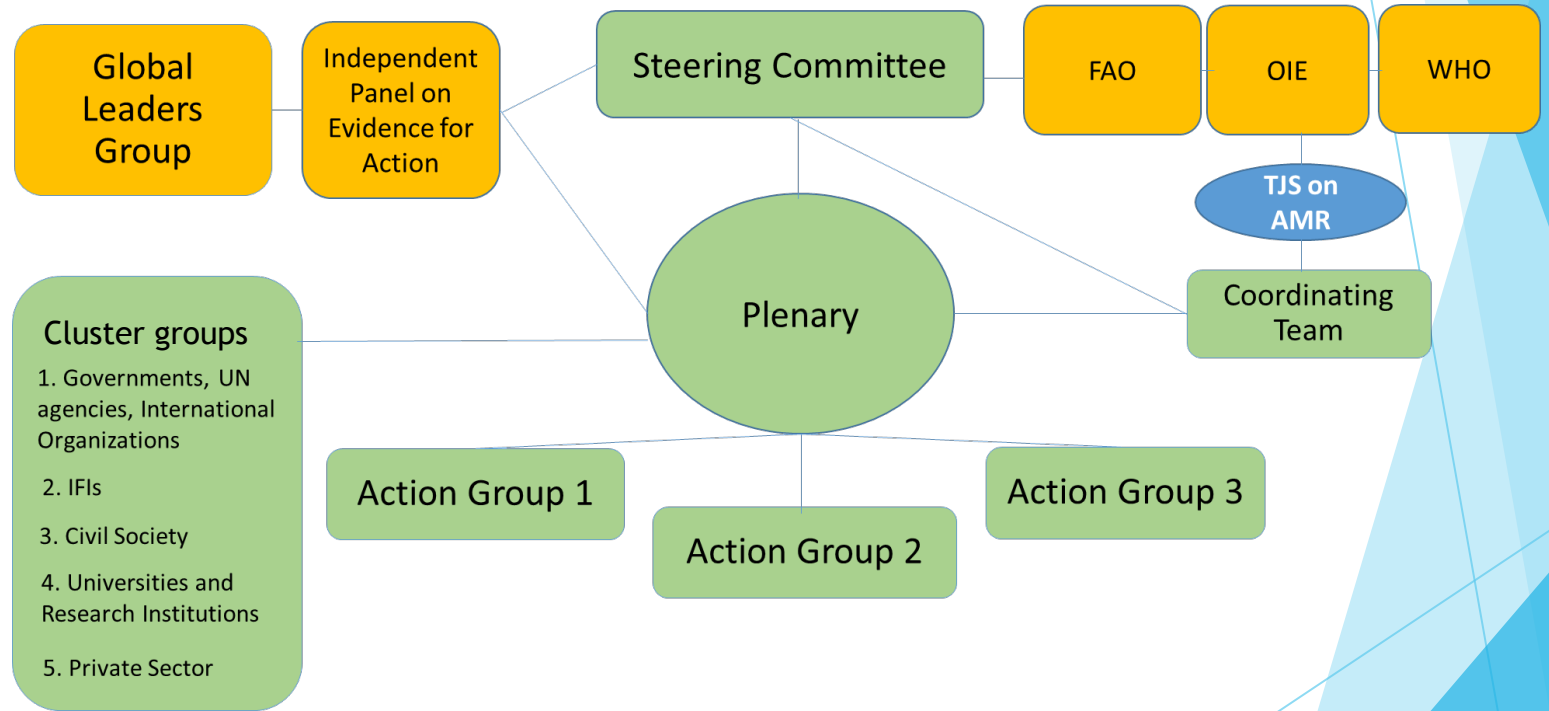

- ✓ **Attract** over 200 members representative of different stakeholder voices and a balance across regions globally;
- ✓ **Drive** multidisciplinary action at global, regional and national levels through Action Groups working on key issues and developing action plans;
- ✓ **Build** global momentum and generate high-level advocacy to combat AMR;
- ✓ **Share and enhance** knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance;
- ✓ **Generate** global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy;
- ✓ **Keep the momentum going** by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action.

AMR Multi-Stakeholder Partnership Platform

Objectives

- Agreeing on a joint vision for change
- Sharing information and networking
- Taking action

Structure

Who's doing what in AMR in our region?
