Telemedicine in Action: Transforming healthcare for LMICs

Artificial Intelligence and Machine Learning in Telemedicine

November 6th, 2025, 14:00 IST

Context: AI and ML are reshaping telemedicine, offering new opportunities to enhance diagnostic accuracy, personalize care, and optimize system efficiency. However, applying AI responsibly in health settings demands thoughtful design, ethical safeguards, and practical understanding.

Objectives: Introduce participants to the use of AI/ML in telemedicine. Highlight current real-world use cases and innovations. Explore ethical, regulatory, and technical considerations for AI integration.

Expected Outcomes: By the end of the webinar, participants will:

- Gain a foundational understanding of how AI and ML are being applied in telemedicine.
- Why do we need AI and ML in telemedicine in order to address key challenges in the sustainability and scalability of telemedicine programs.
- Learn from case studies of AI-driven telemedicine solutions in LMICs.
- Understand the risks, limitations, and ethical challenges of using AI in healthcare.

LIST OF SPEAKERS

Dr. Neha Verma
Co-Founder and CEO
Intelehealth
Telemedicine technology non-profit
that delivers health services where
there is no doctor

Ms. Divya Kamerkar
Co-Founder and CEO
Pinky Promise Pvt. Ltd.
Providing Affordable, Quality, and
Dignified Care for Women — Anytime, Anywhere

Dr. Saif Khairat
PhD, MPH
Professor of Digital Health and AI
Director of Center for VIVE at UNC Chapel Hill
