SITUATION
IN THE PAST
24 HOURS**

SPOTLIGHT

- On the 10th of May 2020, 5 new cases of laboratory-confirmed COVID-19 were announced by the Ministry of Public Health of Thailand (MoPH), bringing the total number of cases to 3,009.
- Of the 3009 cases reported, 2,794 people (93%) have recovered, 159 (5.3%) are still receiving treatment and 56 (1.9%) have died.
- Two new cases were reported today in persons who had close contacts with previously confirmed cases. One case is in Bangkok (female, age 44) and the other case (male, age 80) is in Narathiwat.
- Another three persons were reported in persons who returned from other countries (2 Pakistan, 1 UAE) and were held in state/local quarantine.
- To date, 68 of 77 provinces have reported cases. Of the 68 provinces, 45 have not reported any new cases during the past 28 days. This is an increase of 1 new province from yesterday's report.

ADVICE FOR THE PUBLIC

Reopening must be implemented carefully; even as businesses and public places re-open, all persons in Thailand are reminded of the importance, now more than ever, of practicing the following:

- Regular hand washing with soap, water or an alcohol-based hand rub
- Sneezing or coughing into a tissue or sleeve, followed by hand washing
- Avoid touching eyes, nose, mouth
- Maintain a distance of 1-2 m from other people whenever possible

These basic measures will help to protect you and those around you from COVID-19 and prevent transmission of the virus in the population

Simple ways to prevent the spread of COVID-19 in your workplace

Getting your workplace ready for #COVID19

Promote regular teleworking across your organization.
If there is an outbreak of COVID-19 in your community, the health authorities may advise people to avoid public transport and crowded places.
Teleworking will help your business keep operating while your employees stay safe.

#Coronavirus

WHO and public health authorities around the world are taking action to contain the COVID-19 outbreak. However, long term success cannot be taken for granted.

All sections of our society – including businesses and employers – must play a role if we are to stop the spread of this disease.

*Make sure your workplaces are clean and hygienic.

*Promote regular and thorough hand-washing by employees, contractors, and customers.

*Promote good respiratory hygiene in the workplace

WHAT WHO IS DOING TO PROVIDE SUPPORT TO THAILAND

WHO Thailand is in frequent direct contact with the Royal Thai Government through the Ministry of Public Health, sharing information on key developments, guidelines and scientific updates.

WHO supports the wider UN response, including working with key partners and the Ministry of Public Health to support migrant populations in Thailand. WHO also provides information and advice to staff of the UN system in Thai
