COVID-19 Situation, Thailand
15 June 2022

4,490,760 total confirmed cases
30,386 total deaths

Daily average numbers reported from 09 June to 15 June 2022 (compared to the week prior)

- 2,413 new confirmed cases (2,692) 10%
- 21* deaths (27) 22%
- *(Counting deaths changed to ‘deaths from COVID’ where previously COVID deaths also included ‘deaths with COVID’)
- 2,942 people recovered (4,643) 15%
- 70,025 vaccinations (74,295) 6%

Main messages

- Continue to reduce community transmission of COVID-19 across Thailand
- RTG encourages COVID-free settings and booster vaccinations
- Get vaccinated, maintain universal precautions and stay informed

All data from the Royal Thai Government and Ministry of Public Health unless otherwise stated
New cases, severe cases, ventilated cases and deaths continue to show a weekly decrease. The average number of new laboratory-confirmed (PCR positive) COVID-19 cases reported per day (2,413) decreased by 10% in the past 7 days compared to the previous week (2,692).

Bangkok continues to report by far the highest daily number of COVID cases (with a daily average over the past week of 1,455) but reported a 7-day average decrease of 10%.

The reduction in new cases has seen the average daily number of all currently 'active' COVID-19 cases (23,010) over the last seven days decrease by 27% compared to the previous week (31,318). Most cases continue to be monitored in hospitals, community isolation and home isolation. The average number of COVID cases occupying hospital beds per day over the past week (12,074) decreased by 15%.

The average number of deaths per day over the past week decreased by 22% to 21. Most of these deaths would have been prevented if vaccination rates were higher, particularly in vulnerable groups.

The average daily number of severe COVID-19 cases over the past seven days (659) represented a decrease of 15% over the previous week (776).

The average daily number of ventilated COVID-19 cases over the past seven days (324) decreased by 14% compared to the number the week before (379).

Although nationally new cases are decreasing, the policy of not confirming all probable cases by PCR testing, as well as the widespread use of rapid antigen tests (including those available 'over the counter' that may not be reported), continues to make it difficult to accurately monitor actual case counts.

Vaccination in Thailand continues to significantly reduce levels of severe illness and deaths caused by circulating COVID-19 strains. High vaccination rates also help to reduce the transmission of COVID-19. The COVID-19 situation in Thailand is improving, but there remains a long way to reduce the burden of ventilated cases and deaths from COVID-19 in Thailand. Vaccination rates remain low in some provinces and some important risk groups.
Global Situation
Global COVID-19 (total) cases, deaths and vaccinations to date:
chart showing cases reported per week

533,816,957 confirmed cases
258,020 new cases in last 24 hours
6,309,633 deaths
559 new deaths in last 24 hours
11,864,214,773 vaccine doses administered (6 June 2022)
5,191,662,043 persons vaccinated with at least one dose
4,721,625,990 persons fully vaccinated

Situation by WHO Region

Europe 222,913,637 confirmed
Americas 159,605,214 confirmed
Western Pacific 62,148,182 confirmed
South-East Asia 58,260,872 confirmed
Eastern Mediterranean 21,835,083 confirmed
Africa 9,053,205 confirmed

• Globally, the number of new weekly cases and deaths have continued to decline since a peak in January 2022
• At the regional level, the number of new weekly cases increased in the Eastern Mediterranean Region while it decreased in the remaining WHO regions including the South-East Asia region.

COVID-19 Update 15/06/2022
COVID-19 deaths in Thailand

- Deaths have decreased by 22% in the last week

Source MoPH to 15 Jun 2022
Severe and ventilated COVID-19 cases

Severe and ventilated cases both have decreased by 15% in the past week.

Severe cases
- Current count: 644
- 7 days average: 659
- 7 days decrease: 15%*

Ventilated cases
- Today's count: 322
- 7 days average: 324
- 7 days decrease: 15%*

‘No severe case or ventilated cases data currently available for 7 & 8 May’

Source MoPH to 15 Jun 2022

*Compared to the week prior
COVID-19 hospital bed occupancy (7-day average) and severe cases

Hospital bed occupancy
- 7 days hospital bed average: 12,074
- 7 days average decrease: 16%

All active cases (people in hospital, inpatient facilities, hospitals, or in community or home isolation)
- 7 days all active cases average: 23,010
- 7 days decrease: 27%

Source: MOPH: to 15 Jun 2022
Provincial Situation
The average daily number of confirmed cases in Bangkok over the past week has decreased by 10% compared to the week prior. Cases in Bangkok still make up the greatest proportion of cases.
New COVID-19 cases per million population by province

- The average number of new cases per million population are decreasing across provinces, with lower average rates being reported far more widely across the country.

- Most provinces (71) reported an average rate of less than 50 new cases per million population.

- Five provinces (Chiang Rai, Singburi, Sa Kaeo, Trat, Uthai Thani) have an average rate from 50-100 per million population.

- An average rate in Bangkok is decreasing from 211 to 189 cases per million population.
New COVID-19 deaths per million population by province

- All provinces reported an average rate of death less than 2 cases per million population.

- Trat and Yasothon reported the highest average rate of deaths per million population (1.1-2.0) over the past week.
Vaccination
People who have received:
1st dose: 56,868,398
2nd dose: 52,939,333
3rd dose: 28,965,517

Source CCSA to 14 Jun 2022
Percentage of the population vaccinated against COVID-19 by Province

- Forty-seven out of seventy-seven provinces reported more than 70% 2-dose vaccination coverage.
- Narathiwat and Pattani provinces in the far south still reported less than 50% 2-dose vaccination coverage.
Policy Update
Changes to Thai approved COVID-19 vaccines

- **COOVAX** (Recombinant Spike Protein Vaccine) from the Serum Institute of India (SII) has been approved and listed in emergency use listing (EUL) by the Thai Food and Drug Administration (TFDA) for use in adults 18 years old and more.

- TFDA has approved expanding of age group for two vaccines under EUL
  1. **NOVOVAX**: expanding from 18 years and older to **12 years and older**. The recommended dose will be the same as in Adults – 0.5 ml per dose x 2 doses with 3 weeks interval.
  2. **Moderna**: expanding from 12 years and older to **6 years old and older**. Dose for 6-11 years old will be half of adult dose – 50 mcg (0.25 ml) x 2 doses with 4 weeks interval.

**Note:** A half-dose of Pfizer vaccine can be administered as a booster dose, depending on the clinician’s discretion and the vaccine recipient’s choice.

-AZ can be an option for recipients of AZ+AZ who do not wish to receive mRNA vaccines (>6 months interval)

-Moderna can be considered as booster doses in any regimen above.

-Individuals with a history of COVID-19 infection should get the vaccine 3 months after infection.

ENTRY MEASURES INTO THAILAND
(Effective from 1 June 2022 onwards)

THAI NATIONALS
- THAILAND PASS NOT REQUIRED
  - Enter Thailand without quarantine nor COVID-19 test upon arrival
  - Must present a certificate of vaccination or if unvaccinated, not fully vaccinated, an RT-PCR / Professional ATK COVID-19 test result issued within 72 hours before departure
  - Can enter Thailand via every border checkpoint (for land travel)

FOREIGN NATIONALS

REGISTER ON THAILAND PASS

1. PRE-DEPARTURE
   - Register on tp.consular.go.th

2. REGISTRATION
   - Fully Vaccinated Persons
     - Passport
     - Certificate of vaccination
     - Proof of insurance with at least 500,000 USD coverage for medical treatments in Thailand
   - Unvaccinated / Not Fully Vaccinated Persons
     - Passport
     - COVID-19 RT-PCR/Professional ATK test result issued within 72 hours before traveling
     - Proof of insurance with at least 50,000 USD coverage for medical treatments in Thailand

3. AFTER REGISTRATION
   - Thailand Pass QR Code will be automatically issued within 1-2 hours after you have completed your registration

4. UPON ARRIVAL
   - The Quarantine Health Officer at the airport will review the validity of your documents

MFA updates FAQs relating to Thailand Pass at https://consular.mfa.go.th/th/content/thailand-pass-faqs-2
International transit/transfer passengers must have a health insurance with minimum coverage of 10,000 USD or as prescribed by the government which covers treatment throughout the entire duration of stay in Thailand or any other guaranteed documents.

(The insurance policy is not applied to Thai nationals)
