COVID-19 deaths in Thailand

• Deaths have increased by 10% in the last 7 days.

Source MoPH to 26 Jul 2022
Severe and ventilated COVID-19 cases have increased by 10% and 13% respectively in the past week.

Severe cases
Current count: 903
7 days average: 875
7 days increase: 10%

Ventilated cases
Todays count: 440
7 days average: 408
7 days increase: 13%

‘No severe case or ventilated cases data currently available for 7 & 8 May’

Source MoPH to 26 Jul 2022
Hospital bed occupancy
- 7 days hospital bed average: 11,747
- 7 days average increase: 9.2%

All active cases (people in hospital, hospitels or in community or home isolation)
- 7 days all active cases average: 23,949
- 7 days average increase: 2.4%

Source MOPH: to 26 Jul 2022
Provincial Situation
The average daily number of confirmed cases in Bangkok over the past week has increased by 2.6% compared to a week prior.

Cases in Bangkok still make up the greatest proportion of cases.
New COVID-19 cases per million population by province

- Nationally, the average number of new cases per million population are slightly increasing from 12.76 to 14.83.

- Most provinces (74) reported an average rate of less than 50 new cases per million population.

- Two provinces (Samut Prakan, Uttaradit) have an average rate from 51-100 per million population.

- Bangkok hits highest average rate at 200 cases per million population.
New COVID-19 deaths per million population by province

- Sixty-nine out of seventy-seven provinces reported an average rate of death less than 1 case per million population.

- Two provinces (Nakhon Nayok and Trat) reported the highest average rate of deaths per million population (1.6-2.0) over the past week.
Vaccination
People who have received:
1st dose: 57,107,041
2nd dose: 53,443,288
3rd dose: 30,717,611

Source CCSA to 25 Jul 2022
Percentage of the population vaccinated against COVID-19 by province

- Fifty-three out of seventy-seven provinces reported more than 70% 2-dose vaccination coverage.

- Narathiwat and Pattani provinces in the far south reported less than 50% 2-dose vaccination coverage.
Policy Update
Mask policy

Wearing a mask in Thailand is voluntary following the Royal Gazette from 23 June onward.

Vulnerable groups are suggested to wear a mask to reduce the risk of infection.
- Pregnant women
- Elderly
- People with chronic diseases

However, people are advised to put on masks in crowded or poorly ventilated places.

**Note:** A half-dose of Pfizer vaccine can be administered as a booster dose, depending on the clinician’s discretion and the vaccine recipient’s choice.

- AZ can be an option for recipients of AZ+AZ who do not wish to receive mRNA vaccines (>6 months interval)
- Moderna can be considered as booster doses in any regimen above.
- Individuals with a history of COVID-19 infection should get the vaccine 3 months after infection.
