*Compared to 1 week prior
COVID-19 hospital bed occupancy (7-day average) and severe cases

Hospital bed occupancy
- 7 days hospital bed average: 11.469
- 7 days average decrease: 4.5%

All active cases (people in hospital, hospitals or in community or home isolation)
- 7 days all active cases average: 21,233
- 7 days average decrease: 8.6%

Source MOPH: to 10 Aug 2022
Provincial Situation
The average daily number of confirmed cases in Bangkok over the past week has increased by 5.2% compared to 1 week prior. Cases in Bangkok still make up the greatest proportion of cases.
New COVID-19 cases per million population by province

- Nationally, the average number of new cases per million population is slightly **decreasing from 14.83 to 13.94**.

- **Most provinces (73)** reported an average rate of less than **50** new cases per million population.

- Three provinces (Chumphon, Samut Prakan, Trat) have an average rate of 51-100 per million population.

- **Bangkok** hits the highest average rate at **174** cases per million population.
New COVID-19 deaths per million population by province

- Sixty-nine out of seventy-seven provinces reported an average rate of death less than 1 case per million population.

- **Sing Buri** reported the **highest average rate of deaths** per million population (3.1-4.0) over the past week.
Vaccination
People who have received:

1st dose: 57,176,239
2nd dose: 53,573,666
3rd dose: 31,260,045

Source CCSA to 09 Aug 2022
Fifty-three out of seventy-seven provinces reported more than 70% 2-dose vaccination coverage.

Narathiwat and Pattani provinces in the far south reported less than 50% 2-dose vaccination coverage.

**Note:** A half-dose of Pfizer vaccine can be administered as a booster dose, depending on the clinician’s discretion and the vaccine recipient’s choice.

- AZ can be an option for recipients of AZ+AZ who do not wish to receive mRNA vaccines (>6 months interval)
- Moderna can be considered as booster doses in any regimen above.
- Individuals with a history of COVID-19 infection should get the vaccine 3 months after infection.
