

Coronavirus disease 2019 (COVID-19)

WHO Thailand Situation Report – 10 March 2020

Data as reported by the Thai Ministry of Public Health on 10 March 2020

HIGHLIGHTS

- On the 10th of March 2020, the Ministry of Public Health of Thailand (MoPH) announced three new cases of COVID-19, all Thai nationals, bringing the total number of cases in Thailand to 53.
- One case is a female, age 41, who has not traveled abroad recently, and has been in close contact with one of the confirmed cases announced on 7 March, a Thai national who had recently traveled to Italy. This case was detected by contact-tracing following confirmation of the earlier case.
- The other two cases are a man, age 47, with no travel history, who had symptoms, went to a hospital and was diagnosed and confirmed with COVID-19. His wife, age 46, who had recently returned from travel to Italy, was then also tested and confirmed as a case.
- Of the 53 laboratory-confirmed COVID-19 cases reported in Thailand, 33 have recovered, 19 are in hospital and one has died. 40 are imported cases, and 13 are locally-transmitted cases.
- There are 1,875 PUIs, this number includes people being treated for other conditions who are no longer suspected of having COVID-19 infection.

THAILAND SITUATION IN NUMBERS

total and new cases in last 24 hours

53 confirmed (3 new)
1 death
1,875 persons under Investigation / treatment

Number of Case

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

The basic principles to reduce the general risk of transmission of acute respiratory infections, including by the virus causing COVID-19, include the following:

- Avoiding close contact with people suffering from acute respiratory infections.
- Frequent hand-washing, especially after direct contact with ill people or their environment.
- Avoiding unprotected contact with farm or wild animals.
- People with symptoms of acute respiratory infection should practice cough etiquette (maintain distance, cover coughs and sneezes with disposable tissues or clothing, and wash hands).

- Within healthcare facilities, enhance standard infection prevention and control practices in hospitals, especially in emergency departments.
- Advice from WHO on cleaning practices and the survivability of the SARS-CoV-2 virus on surfaces & in different settings, available [here](#).

WHO does not recommend any specific health measures for travelers. In case of symptoms suggestive of respiratory illness either during or after travel, travelers are encouraged to seek medical attention and share their travel history with their healthcare provider.

MEDIA

- WHO Thailand continues to receive media queries about the outbreak and through its [website](#) provides relevant content on a regular basis to the public and other constituencies. Media queries can be directed to sehwwebmaster@who.int and risleyp@who.int
- WHO Thailand's [Twitter](#) and [Facebook](#) accounts post useful information on hygiene and protection, such as when and how to use masks, as well as relevant WHO technical guidelines and other content related to the novel coronavirus situation in Thailand and globally.

WHO THAILAND STRATEGIC OBJECTIVES

WHO Thailand's strategic objectives to support Thailand's response are to:

- Limit human-to-human transmission including reducing secondary infections among close contacts and health care workers, preventing transmission amplification events, and preventing further spread within as well as to and from Thailand¹;
- Identify, isolate and care for patients early, including providing optimized care for infected patients;
- Address crucial unknowns regarding clinical severity, extent of transmission and infection, treatment options, and accelerate the development of diagnostics, therapeutics and vaccines;
- Communicate critical risk and event information to all communities and counter misinformation; and
- Minimize social and economic impact through multisectoral partnerships.

PREPAREDNESS AND RESPONSE

What Thailand is doing

- Thailand has strong capacities for case detection, risk assessment, case investigation, laboratory diagnosis, clinical management, infection prevention and control, and risk communication.
- Thailand is also updating its dedicated national pandemic influenza preparedness plan (pending approval by the Prime Minister's Cabinet).
- With WHO support, the National Institute of Health of Thailand is supporting specimen testing for other countries as requested.
- The Health Ministry is conducting modelling exercises with the National Research Council of Thailand to forecast possible scenarios and outcomes as the outbreak evolves in Thailand.
- Visitors to Thailand traveling from affected areas are being screened and provided information upon arrival by the Ministry of Public Health, including how to report any possible illness to the Department of Disease Control using the 1422 hotline.
- The Ministry has also introduced a self-reporting online tool, available in Thai, English and Chinese, which can be accessed [here](#).

What WHO is doing in Thailand

- WHO Thailand remains in regular and direct contact with the Royal Thai Government through the Ministry of Public Health, sharing information with the Government including key developments elsewhere, as well as guidelines and updates;
- WHO supports the wider UN response and provides relevant information and advice to staff of the UN system in Thailand;
