Hospitalized

101
Health care staff
infected

2,547
Recovered

THAILAND
SITUATION IN THE
PAST 24 HOURS

HIGHLIGHTS

- On the 25th of April 2020, 53 new cases of laboratory-confirmed COVID-19 were announced by the Ministry of Public Health of Thailand, bringing the total number of cases to 2,907.
- Of these, 87.6% (2,547) have recovered, about 1.8% (51) have died, and 10.6% (309) are receiving treatment.
- No cases were identified in persons returning from outside Thailand; likely reflecting restrictions on entry.
- Three of the new cases are close contacts of previously confirmed cases, one case attended a crowded place.
- Seven cases were detected through enhanced surveillance (active case finding) in Yala Province.
- In total, 42 new cases were identified in an immigrant detention centre in Songkhla Province. These cases were detected through mass screening following the identification of a case in mid-April.
- To date, 68 of the total 77 provinces have reported cases. A total of twelve of these provinces have not detected any new cases for the past 28 days.

UPDATE FROM THE MINISTRY OF PUBLIC HEALTH

COVID-19 response plan for Thailand

- COVID-19 response measures are managed by local authorities based on a national framework. The enhanced measures to be applied will vary according to the level of assessed risk (the degree to which the epidemic is under control).
- Basic measures that will be implemented by all provinces, regardless of level of risk are as follows:
 - Promoting health literacy on prevention and control of COVID-19, including personal hygiene
 - Active case detection and isolation of case, tracing and quarantining their contacts
 - Protection of vulnerable groups i.e. the elderly those with chronic diseases
 - Healthcare facility preparedness, including enhanced infection prevention and control
 - Increasing social distancing by promoting:
 - Working from home: (70% of government employees) and flexible/staggered working hours to reduce crowding of public transportation
 - Online business (shopping, banking, etc.)
 - Measures to be applied in the direct service sector (e.g. shops and businesses)

NEW AND CUMULATIVE COVID-19 CASES IN THAILAND | BY DATE OF REPORTING

- Additional measures – that may either be applied at local on a compulsory basis, or relaxed based on the assessed level of risk
 - Travel restrictions and screening
 - Closure of establishments or venues where people may gather in large numbers or the risk of transmission is high
 - Curfew
- Principles for easing the compulsory measures
 - Continuous monitoring and assessment of risk at local level
 - Assessment of whether establishments/venues are considered to provide essential services
 - Degree of compliance with measures by establishments/service providers and the local population

ADVICE FOR THE PUBLIC

Smoking damages your lungs and other parts of your body, and may increase your risk of getting a severe case of COVID-19

What who is doing to provide support to Thailand

WHO Thailand is in frequent direct contact with the Royal Thai Government through the Ministry of Public Health, sharing information on key developments, guidelines and scientific updates.

WHO supports the wider UN response, including working with key partners and the Ministry of Public Health to support migrant populations in Thailand. WHO also provides information and advice to staff of the UN system in Thailand.

Media

WHO Thailand's website, Twitter and Facebook accounts, regularly provide content on all aspects of the outbreak in Thailand and around the world. Media queries can be directed to sethawebmaster@who.int and kanpirom@who.int
