

Coronavirus Disease 2019 (COVID-19)

Situation Report – 81

Timor-Leste

Data as reported by 06 January 2021

HIGHLIGHTS

- The Ministry of Health (MoH) reported five new cases of COVID-19 in the first week of January – taking the total tally of COVID-19 cases in Timor-Leste to 49. All patients were in quarantine and are now admitted to the designated isolation and treatment facility at Vera Cruz. Further investigation and contact tracing are being done by the surveillance team as per the national guideline. More details about the new cases can be found at the Ministry of Health's (MoH) Facebook page, [Palacio das Cinzas](#).
- The President of the Democratic Republic of Timor-Leste, H.E. Francisco Guterres Lú-Olo, declared the 9th State of Emergency for 30 days effective immediately from 0059hrs 3rd January to 2359hrs 1st February 2021, following the request from the Government due to increasing number of COVID-19 cases. The government announced closure of land and sea borders and stricter enforcement of preventive measures such as prohibition on gathering of more than 10 people, compulsory mask use in public places and other standard COVID-19 prevention measures such as handwashing and physical distancing among other preventive measures.
- To ensure smooth continuity of essential health services during the COVID-19 pandemic, WHO supported Electrolyte Analyzer to the National TB Programme under the aegis of the Ministry of Health. The equipment provided will be placed in the Hospital National Guido Valadares (HNGV), referral hospitals, and Klibur Domin for clinical management of DR-TB patients on all oral shorter treatment regimens. Also, WHO supported seven laptops for the National TB Programme manager and six regional supervisors for effective planning, monitoring, and evaluation of the TB programme.

SITUATION IN NUMBERS

49 confirmed (5 new)
6 recovered
12 isolation
0 deaths

WHO TIMOR-LESTE STRATEGIC OBJECTIVES

- Interrupt human-to-human transmission including reducing secondary infections among close contacts and health care workers, preventing transmission amplification events;
- Strengthening of surveillance systems and increasing laboratory capacity to detect COVID-19 cases;
- Ensuring adherence to the strictest standards of infection prevention and control (IPC) and increase capacity for IPC;
- Identify, isolate and care for patients early, including providing optimized care for infected patients;
- Communicate critical risk and event information to all communities and counter misinformation;

- Minimize social and economic impact through multisectoral partnerships.
-

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

Wash your hands frequently

Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water.

Why? Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your hands.

Maintain physical distancing

Maintain at least 1 metre (3 feet) distance between yourself and others.

Why? When someone coughs or sneezes they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you can breathe in the droplets, including the COVID-19 virus if the person coughing is infected.

Use face mask when physical distancing is not possible

Why? If when you're in a setting where maintaining the physical distance of 1 meter or more is not possible due to the space constraint, then it is imperative that you use a face mask as it can help in stopping the transmission of COVID-19

Avoid touching eyes, nose and mouth

Why? Hands touch many surfaces and can pick up viruses. Once contaminated, hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body and make you sick.

Practice respiratory hygiene

Make sure you, and the people around you, follow good respiratory hygiene. This means covering your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue safely immediately.

Why? Droplets spread virus. By following good respiratory hygiene you protect the people around you from viruses such as cold, flu and COVID-19.

If you have fever, cough and difficulty breathing, seek medical care early

Stay home if you feel unwell. If you have a fever, cough and difficulty breathing, seek medical attention and call in advance. Follow the directions of health authorities.

Why? Calling in advance will allow your health care provider to quickly direct you to the right health facility. This will also protect you and help prevent spread of viruses and other infections.

Stay informed and follow advice given by your healthcare provider

Stay informed on the latest developments about COVID-19. Follow advice given by your healthcare provider, your national and local public health authority or your employer on how to protect yourself and others from COVID-19.

Why? National and local authorities will have the most up to date information on whether COVID-19 is spreading in your area. They are best placed to advise on what people in your area should be doing to protect themselves.

Protect ourselves and our loved ones against #COVID19:

- ↪ **Wash your hands frequently**
- ↪ **Cover coughs and sneezes**
- ↪ **Avoid touching your face**
- ↪ **Avoid crowded places and limit time in enclosed spaces**
- ↪ **Keep a distance of at least 1 metre from others**
- ↪ **Use of mask is imperative when physical-distancing is not possible.**
- ↪ **Regularly clean and disinfect frequently touched objects and surfaces**
- ↪ **Isolate yourself from others if feeling unwell and seek care, if needed**
