

Coronavirus Disease 2019 (COVID-19)

Situation Report – 17

Timor-Leste

World Health
Organization
Timor-Leste

Data as reported by 11 March 2020

CURRENT SITUATION

- Currently, there are **NO** cases of Coronavirus Disease 2019 (COVID-19).
- However, the Ministry of Health remains vigilant and ready to respond appropriately as the situation develops.
- **Suspected COVID-19 Case 1** whose test result came as **negative** from the laboratory in Australia was announced by the Ministry of Health (MoH) in a press conference yesterday. The person was discharged yesterday and poses no threat to public health.
- **Suspected COVID-19 Case 2** as notified by the MoH continues to be stable and under medical observation by the MoH. His swab sample was collected and sent to Australia on Tuesday, March 10, 2020 to Royal Darwin Hospital for testing. The results will be available tomorrow and will be announced by the MoH per usual.

- **Coordination:** The DG, MoH convened the Health Cluster meeting on Tuesday, 10 March 2020 to review preparedness and response. The security issue at the identified quarantine facilities was discussed and the DG, Ministry of Interior shared the steps being taken to address the same. There was also a discussion about immigration guidelines for travellers coming to Timor-Leste from high-risk countries. National Directorates and partners provided information on the contributions being made to support Covid-19 response and address gaps in the system.
- **Surveillance & Contact Tracing:** The surveillance department, MoH recruited ten newly graduated doctors. These doctors underwent intensive surveillance and contact tracing training as well as using the online database on 9 and 10 March, 2020. Additionally, MoH and WHO team briefed the situation for COVID-19 epidemic and response to the participants of the Municipality surveillance and Health Management Information system (HMIS) coordination meeting.
- **Isolation and Quarantine:** The importance of establishing quarantine and observation facilities at the earliest is acknowledged and stressed upon by the highest level in the Government. It is provisioned that in addition to Tibar and Formosa, Vera Cruz and Metinaro sites should ideally be

readied. The Government has assured that the situation will be explained to the local communities and also deploy additional security to ensure law and order at these locations. Trained health workers, medicines, supplies and equipment have been made available at Tibar; security is being reinforced.

- **Laboratory testing:** WHO provided primers and probes to the National Health Laboratory (NHL). The 100 test kits are adequate to carry out 1,000 COVID-19 tests.

The referral system for COVID-19 testing at the Victorian Infectious Diseases Reference Laboratory is in place and functional. The referral SOPs have been revised and updated.

- **Personal Protective Equipment (PPE):** WHO has provided PPE for health workers and emergency responders for Coronavirus Disease 2019 (COVID-19) preparedness and response to the Ministry of Health (MoH). This includes 20,000 gloves, 32,000 face masks/respirators, 1000 gown and 500 goggles. The PPEs are housed at Servico Autonomo de Medicamentos e Equipamentos de Saude (SAMES) in Kampong Alor in Dili. In addition to the contribution from WHO, the Australian Government has provided 6,600 face masks, 2000 isolation gowns, 1,500 gloves, 2,000 N95 masks, and 204 units of surgical scrub gel.
- **Risk Communication:** There have been continuous and consistent advocacy and sensitization session for line ministries and government agencies, international nongovernmental organizations, health development partners, faith based institutions and communities at large. There also has been large scale distribution of information education communication (IEC) materials.

MEASURES TAKEN

Steps being taken by the government with WHO and partners' supports, to respond to the situation include:

Tuesday, 10 March 2020

- WHO conducted a sensitization session for the French transportation company Bollere. As many as 20 employees of the company participated in the session.
- Another session was conducted for the Asia Foundation to share information on COVID-19 and prevention measure. A similar session was also organized for Cruz Vermelha Timor-Leste (CVTL).
- Another team of WHO doctors travelled to Atauro island across Dili to hold several community sensitisation session in collaboration with the Dili Municipal Administration and Dili District Health Director.

Monday, 09 March 2020

- WHO conducted a briefing and question and answer session for Partnership for Human Development (PHD).
- The Health Cluster met to review preparedness and response. The security issue at the identified quarantine facilities was discussed and the DG, Ministry of Interior shared the steps being taken to address the same. There was also a discussion about immigration guidelines for travellers coming to Timor-Leste from high-risk countries. National Directorates and partners provided information on the contributions being made to support Covid-19 response and address gaps in the system.

Saturday, 7 March 2020

- MoH and WHO conducted another sensitisation session for the maritime police, border police and immigration officers on COVID-19.

Friday 6 March 2020

- WHO team conducted sensitization session for Serviço Nacional de Inteligência (SNI) at Caicoli, Dili. The Director General of SNI and staff participated in the session. The team also disseminated IEC materials during the session.
- The Inter-ministerial Coordination Committee for COVID-19 met on the second consecutive day to draft a National Contingency Plan. Director-Generals and senior officials of various ministries were present in the meeting. The MoH with technical support from WHO will put together a report before a second deliberation is held.

Thursday 5 March 2020

- The Inter-ministerial Coordination Committee for COVID-19 held its first meeting on Thursday, 05 March 2020. The Ministry of Health presided the meeting. In addition to the members of the committee, H.E Former President Dr Jose Ramos Horta also participated. While H.E Minister of Health outlined the roles and responsibilities of different line ministries and government agencies for a coordinated and concerted response, H.E Former President stressed on the need to act urgently.
- The MoH in partnership with UNICEF Timor-Leste and President Authority of Dili Municipality conducted a briefing on preventive measures for COVID-19 for all of Dili community leaders — Chief of Sucos, Aldeias, and village leaders. H.E Former President José Ramos Horta who was present for the event also addressed the gathering.
- WHO team conducted a briefing session for FFDTL Military Police personnel at Military Police Headquarters at Kintal Boot, Dili.
- Oxfam through its programme network in Oecusse conducted sensitization sessions for as many as five civil society organizations and helped distribute printed IEC materials to

different partners in Dili.

Wednesday 4 March 2020

- H.E Acting Minister of Health held a meeting with Minister of Foreign Affairs and Cooperation, Minister of Agriculture and Fisheries, and representative from the Ministry of Defense to discuss the preparedness and response for COVID-19. Furthermore, the Acting Minister of Health also assured that MoH Surveillance team continues to monitor all Points of Entries (airports, ports and land borders).
- The President of Red Cross Timor-Leste and team met with H.E Acting Minister of Health to discuss how Red Cross Timor-Leste can support the MoH on COVID-19 surveillance activities as well as with quarantine facility and other resources that may be needed.

Tuesday 3 March 2020

- The Embassy of People's Republic of China in Timor-Leste provided infrared thermal scanner and hand held thermal scanners to Timor-Leste. The scanner was installed at Dili airport to replace the old one, which has helped improve the efficiency and accuracy of passenger temperature scanning.
- WHO team met the Bishop of Diocese of Maliana to brief him on COVID-19 and requested the Bishop to capitalize on the influence and reach of the Church to educate and sensitize communities about COVID-19. In addition, the team also met with the President Authority of Bobonaro Municipality and health staff of Bobonaro District Health Office. The goal of these briefing sessions is to provide them with accurate information on COVID-19, which will enable them to pass on the information to the communities to prevent panic, spread of misinformation and rumors.

Tuesday 03 March 2020

- A meeting on Covid-19 response was convened by H.E Vice Minister for Health and Interim Minister for Health. National Directors of MoH, and District Health Directors from municipalities were present in the meeting. WHO provided the technical support. It was confirmed that Vera Cruz CHC would be designated as the Isolation facility and FDTL Metinaro as the Quarantine facility. A joint MoH-WHO team will conduct a site assessment of Vera Cruz tomorrow so that this facility can be upgraded quickly to serve as a treatment centre for suspected and confirmed cases of Covid-19.

Monday 02 March 2020

- Health Cluster coordination meeting: An updated WHO risk assessment of country preparedness (as on 01 March 2020) was discussed in detail and areas with significant gaps (e.g. lack of a functional Isolation Ward and a separate Quarantine Facility) were identified. Partners agreed to contribute to specific areas (e.g. setting up temporary 'holding facilities' at land borders and the airport).
- Humanitarian Country Team (HCT) meeting: The checklist for country preparedness for Covid-19

was discussed and partners were requested to extend support in areas with gaps.

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

During previous outbreak due to other coronavirus (Middle-East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS), human-to-human transmission occurred through droplets, contact and fomites, suggesting that the transmission mode of the 2019-nCoV can be similar. The basic principles to reduce the general risk of transmission of acute respiratory include the following:

- Avoiding close contact with people suffering from acute respiratory infections.
- Frequent hand-washing, especially after direct contact with ill people or their environment.
- Avoiding unprotected contact with farm or wild animals.
- People with symptoms of acute respiratory infection should practice cough etiquette (maintain distance, cover coughs, and sneezes with disposable tissues or clothing, and wash hands).
- Within healthcare facilities, enhance standard infection prevention and control practices in hospitals, especially in emergency departments.

WHO does not recommend any specific health measures for travellers. In case of symptoms suggestive of respiratory illness either during or after travel, travellers are encouraged to seek medical attention and share their travel history with their healthcare provider.

Should you wear a mask?

YES, if you are experiencing uneasiness in breathing, cough

YES, while caring for persons with respiratory (breathing) symptoms

YES, all health workers should while attending to persons with respiratory symptoms

NOT required for general public without respiratory symptoms

Protect others from getting sick

Cover mouth and nose with tissue, sleeve or elbow when coughing or sneezing

Throw tissue into closed bin after use

Clean hands after coughing or sneezing and when caring for the sick

World Health Organization

Protect yourself from getting sick

Avoid unprotected contact with sick people (including touching one's eyes, nose or mouth) and with live farm or wild animals

World Health Organization

Protect others from getting sick

Avoid close contact when you are experiencing cough and fever

Avoid spitting in public
