

Coronavirus Disease 2019 (COVID-19)

Situation Report – 37

Timor-Leste

Data as reported by 26 May 2020

HIGHLIGHTS

- While responding to the COVID-19 pandemic maintaining essential health services is as imperative. The Ministry of Health (MoH) and Ermera Municipal Health Services with technical support from WHO conducted dengue case management refresher training for community health center (CHC) in Gleno, Ermera. As many as 36 health care providers in attended the training.
- The MoH, HNGV, NHL, CDC department and Surveillance Department with technical support from WHO, Maluk Timor, St. John of God, and UNFPA are training the newly recruited surveillance and quarantine staff. The training curriculum includes basic epidemiology, integrated surveillance and response guidelines, COVID surveillance and contact tracing guidelines, code of conduct, and protection of vulnerable populations among others. This is the first of three trainings for the newly recruited staff under the emergency response for COVID - 19.

SITUATION IN NUMBERS

24 confirmed (0 new)

0 deaths

(As per data released by [Centro Integrado Gestao de Crise](#))

Global Highlights

- WHO has partnered with Vital Strategies and other global partners to launch a new technical package: [Revealing the Toll of COVID-19: A Technical Package for Rapid Mortality Surveillance and Epidemic Response](#). This is a technical package for rapid mortality surveillance and epidemic response to support national governments with surveillance and response planning surrounding COVID-19.
-

WHO TIMOR-LESTE STRATEGIC OBJECTIVES

- Interrupt human-to-human transmission including reducing secondary infections among close contacts and health care workers, preventing transmission amplification events;
 - Strengthening of surveillance systems and increasing laboratory capacity to detect COVID-19 cases;
 - Ensuring adherence to the strictest standards of infection prevention and control (IPC) and increase capacity for IPC;
 - Identify, isolate and care for patients early, including providing optimized care for infected patients;
 - Communicate critical risk and event information to all communities and counter misinformation;
 - Minimize social and economic impact through multisectoral partnerships.
-

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

Wash your hands frequently

Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water.

Why? Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your hands.

Maintain physical distancing

Maintain at least 1 metre (3 feet) distance between yourself and others.

Why? When someone coughs or sneezes they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you can breathe in the droplets, including the COVID-19 virus if the person coughing is infected.

Avoid touching eyes, nose and mouth

Why? Hands touch many surfaces and can pick up viruses. Once contaminated, hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body and make you sick.

Practice respiratory hygiene

Make sure you, and the people around you, follow good respiratory hygiene. This means covering your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue safely immediately.

Why? Droplets spread virus. By following good respiratory hygiene you protect the people around you from viruses such as cold, flu and COVID-19.

If you have fever, cough and difficulty breathing, seek medical care early

Stay home if you feel unwell. If you have a fever, cough and difficulty breathing, seek medical attention and call in advance. Follow the directions of health authorities.

Why? Calling in advance will allow your health care provider to quickly direct you to the right health facility. This will also protect you and help prevent spread of viruses and other infections.

Stay informed and follow advice given by your healthcare provider

Stay informed on the latest developments about COVID-19. Follow advice given by your healthcare provider, your national and local public health authority or your employer on how to protect yourself and others from COVID-19.

Why? National and local authorities will have the most up to date information on whether COVID-19 is spreading in your area. They are best placed to advise on what people in your area should be doing to protect themselves.

More guidance on preventive measures is available [here](#).

COVID-19 Information and media queries:

- The MoH has established a hotline number – 119 – for COVID-19 on which people can call to get any COVID-19 related information.
 - Additionally, [MoH Facebook page](#) provides timely updates on COVID-19 developments in the country.
 - WHO Timor-Leste through its [Facebook page](#) and [Twitter handle](#) also disseminates information on preventive measures, questions and answers, myth-busters and latest updates on COVID-19 globally and nationally. For media queries and interviews requests can be sent to singhsho@who.int and hasane@who.int
