

UN-Water Global Analysis
and Assessment of Sanitation
and Drinking-Water

GLAAS Process

Module 3

GLAAS 2016/2017 cycle

World Health
Organization

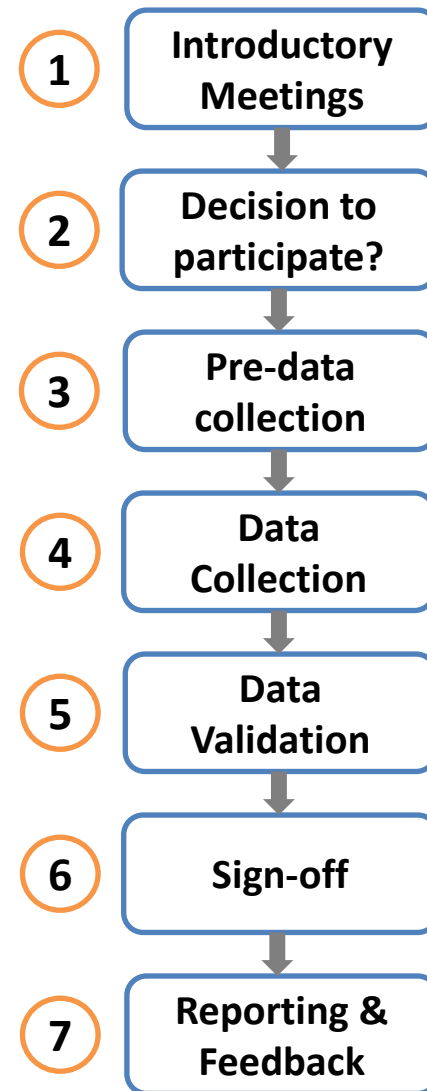

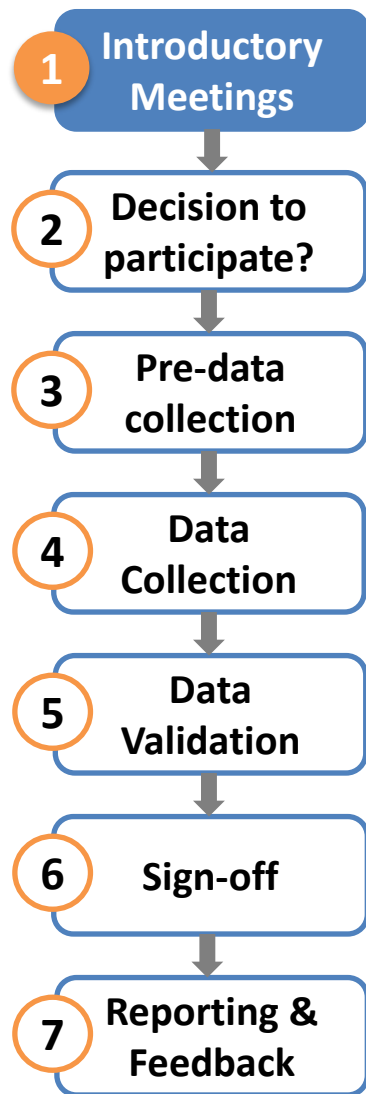

Overview

- This module will give an overview of the proposed process for implementing GLAAS at country level
- Data collection will be through Fall 2016

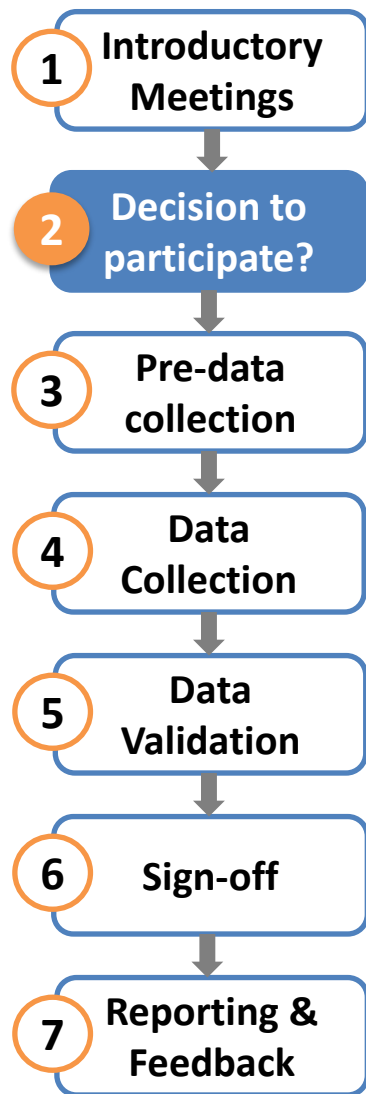

Suggested GLAAS Process

Introductory Meetings

- ☐ Meetings with key stakeholders and government representatives

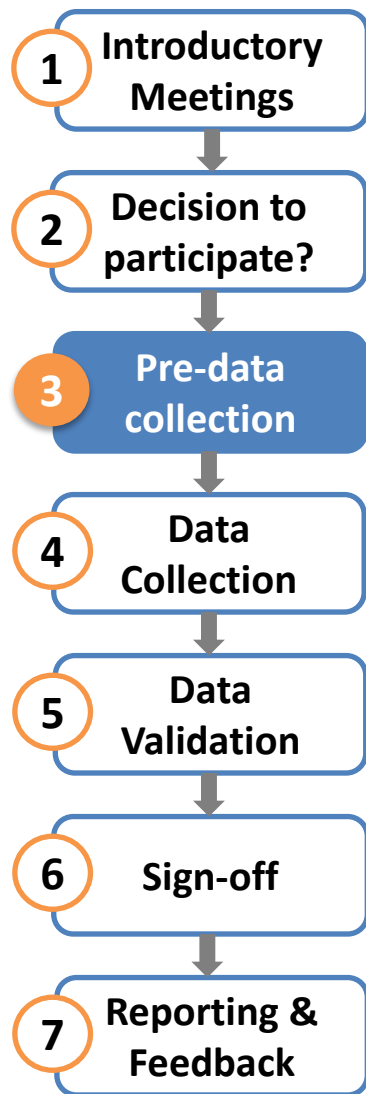

Decision to Participate?

- ☐ Decision by government to participate in GLAAS?

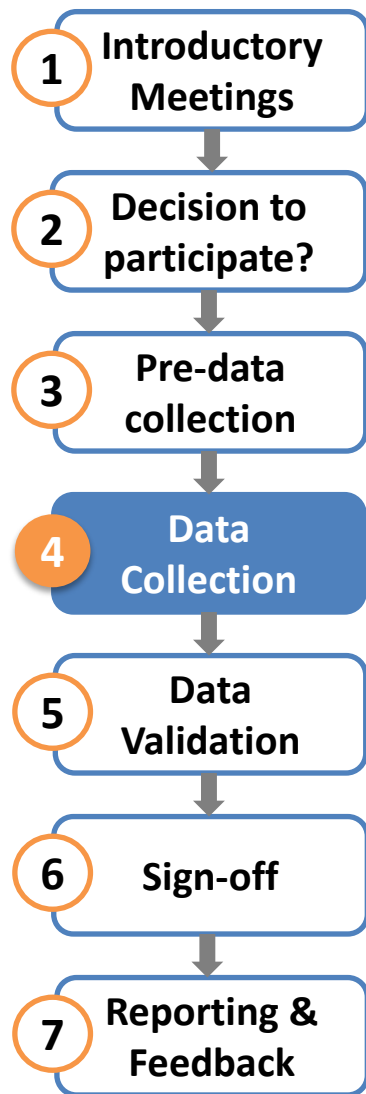

If yes:

- ☐ Identify a National Focal Person
- ☐ Identify resource needs from WHO and outline brief work plan

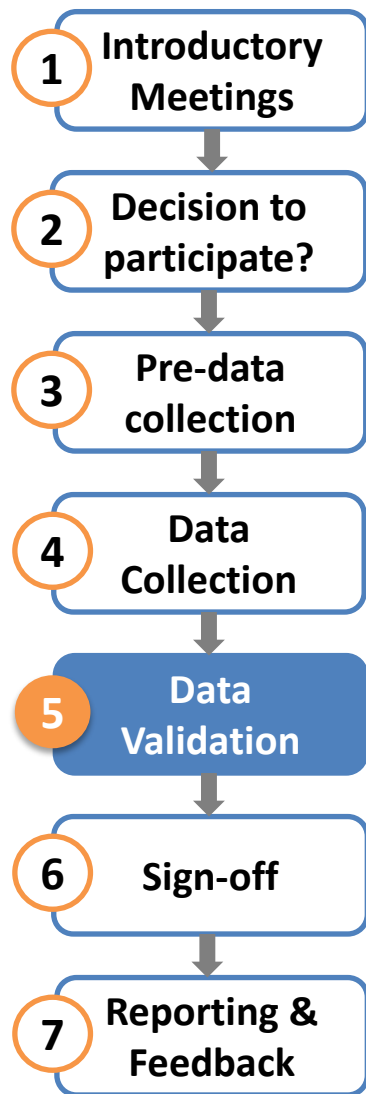

Pre Data-Collection Phase

- ❑ Gather copies of any relevant sector documents, strategies and plans
- ❑ Kick-off workshop to present GLAAS to government and key stakeholders

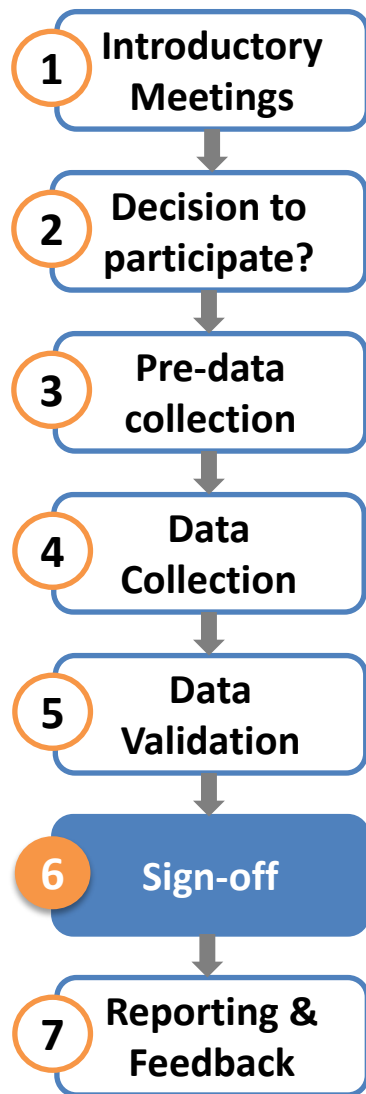

Data Collection Phase

- ❑ National Focal Point coordinates response to GLAAS survey

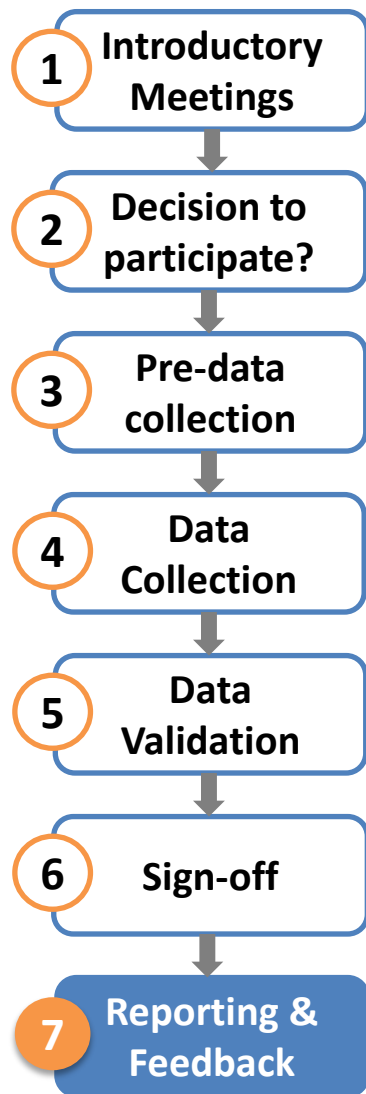

Data Presentation & Validation

- ☐ Quality assurance and review of results
- ☐ Findings are presented at multi-stakeholder meeting

Government Sign-Off

- ❑ The Government reviews the data and signs off on the results before submission

Reporting and Feedback

- ☐ Publication of data online
- ☐ Production of Country Highlights
- ☐ Feedback and evaluation of process

Additional Forms to be Submitted

- ☐ Data release consent form
- ☐ Data collection process form
- ☐ Feedback form

Examples of Best Practice

Kenya and Ethiopia

UN-Water Global Analysis
and Assessment of Sanitation
and Drinking-Water

Kenya: GLAAS Process in 2014

- Following the GLAAS regional meeting in Burkina Faso in 2013, delegates from Kenya held an inception & validation meeting, with the support of WHO, to brief WASH Partners on the survey tools
- Sector Ministries and WASH stakeholders came together in a joint Meeting during inception of GLAAS processes
- The focal point for GLAAS was in the Ministry of Health WASH Hub
- GLAAS processes were strongly supported by the Director of Public Health
- WASH stakeholders and the line ministry worked together to respond to the 2014 GLAAS survey

Kenya: Lessons Learnt from 2014

- More time and resources should be allocated to sensitize partners and sector Ministries on the GLAAS process, with a clear action plan assigned to every member
- The GLAAS process has helped to inform new strategies and the development of a WASH investment plan

Ethiopia: GLAAS Process 2014

- GLAAS data collection was led by WHO with inputs from sector Ministries
- Used existing available data provided by relevant sector Ministries (Health and Water)
- Strong representation of Ministers at the SWA High Level Meeting

Ethiopia: Lessons Learnt from 2014

- A larger platform is needed for GLAAS to increase stakeholder ownership and input
- GLAAS processes should be aligned with existing sector-wide coordination mechanisms and review processes
- In the future, GLAAS processes should be managed by a National WASH Coordination Structure
