

# UN-WATER GLOBAL ANALYSIS AND ASSESSMENT OF SANITATION AND DRINKING-WATER (GLAAS)

External Support Agency (ESA) Survey

April 2022

#### I. What is GLAAS?

The Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS) is a UN-Water initiative that began in 2008 and is implemented by the World Health Organization (WHO). GLAAS responds to a continuing need to inform policy-making and strengthen the monitoring of national sanitation, drinking-water and hygiene (WASH) programmes and activities.

GLAAS reports assess data from several different sources, including global data on sanitation and drinking-water coverage<sup>1</sup>, donor aid flows<sup>2</sup>, economic and development indicators<sup>3</sup>, and health indicator data<sup>4</sup>. GLAAS gathers data from both recipient countries and external support agencies to fill key knowledge gaps. For more information see: <a href="https://www.who.int/teams/environment-climate-change-and-health/water-sanitation-and-health/monitoring-and-evidence/wash-systems-monitoring/un-water-global-analysis-and-assessment-of-sanitation-and-drinking-water.">https://www.who.int/teams/environment-climate-change-and-health/water-sanitation-and-health/monitoring-and-evidence/wash-systems-monitoring/un-water-global-analysis-and-assessment-of-sanitation-and-drinking-water.</a>

#### II. How is this survey conducted?

Each GLAAS cycle, bi-lateral and multi-lateral agencies, UN organizations, private foundations, and other NGOs that provide development aid, technical assistance, research, or other support to WASH, a.k.a. external support agencies (ESAs), are invited to participate in the UN-Water GLAAS ESA survey. These data augment information provided by countries and present a full picture of actions and activities related to WASH.

#### III. What's new in the GLAAS 2022 ESA survey?

The GLAAS 2022 ESA survey focuses specifically on <u>sanitation and hand hygiene</u>. Previous GLAAS findings have shown that sanitation has been a longstanding priority, but assistance continues to lag behind that for drinking-water, and the COVID-19 pandemic revealed health vulnerabilities due to poor hygiene. Therefore, WHO would like to better understand how ESAs are approaching sanitation and hand hygiene, their successes as well as challenges. There are also new questions on gender, climate resilience and COVID-19 response.

#### IV. What WASH sector initiatives does GLAAS support?

In addition to providing WASH policy-makers and practitioners with a more comprehensive evidence base, the GLAAS process also informs political decision-making, particularly through its association with Sanitation and Water for All (SWA). ESAs and country governments participating in the GLAAS survey will be encouraged to participate in high-level dialogue which will feed into SWA's Sector Ministers' Meeting (SMM) in May 2022. The SMM as well as the subsequent Finance Ministers' Meeting (FMM) provide a platform for discussions and agreement on actions to increase access to sanitation and drinking-water.

GLAAS is also involved in collaborative monitoring efforts under Sustainable Development Goal (SDG) 6 and related targets and indicators. GLAAS works closely with OECD and UN partners to provide data and harmonize methods for monitoring of means of implementation targets 6a – international cooperation, and 6b – local participation.

### V. How will data from this survey be presented?

A detailed summary of external support to the WASH sector will be presented in the GLAAS 2022 report. The report will discuss status and trends in: the targeting of aid, aid to water and sanitation, prioritization of recipient countries, regional targeting, aid allocation breakdowns, types of aid, funding channels, and future targets. ESA support for sanitation and hand hygiene will be a focus of the ESA analysis in the GLAAS 2022 report.

Data from the ESA survey will also be available on the GLAAS data portal, <a href="https://glaas.who.int">https://glaas.who.int</a>, after the GLAAS 2022 report is released.

Responses to the survey may also support monitoring of SDG 6, and related targets and indicators, specifically means of implementation target 6a (amount of ODA aligned with government budgets and plans).

<sup>&</sup>lt;sup>4</sup> World Health Statistics, WHO

#### VI. What information is collected?

As in past years, GLAAS has developed a survey that aims to capture data on aid flows and information on ESA priorities, future planning and alignment, and how aid is being delivered; this year the focus is on <u>sanitation and hand hygiene</u>.

Working closely with OECD and data collected through the Creditor Reporting System (OECD-CRS), the aim is to make the best use of existing data sets. For those donors that already report to the OECD-CRS, there is the option to skip Questions 5 and 6 that duplicate information requested by OECD.

#### VII. Who should complete the survey?

Sanitation/hand hygiene team leaders/staff at the headquarters level of most organizations will be able to answer most of the questions in this survey, although, assistance of financial or human resource officers may be needed to complete certain sections of the survey regarding financial flows or level of effort in the WASH sector.

For bi-lateral donors with multiple agencies contributing to WASH sector activities, either one combined survey response from all (or a majority of) contributing agencies or separate survey responses are acceptable, whichever is most appropriate. For instance, if one large institution provides a majority of aid from the country completing the survey, then one combined survey response may be more applicable than several separate responses, whereas if two agencies each provide a significant percentage of aid using different modalities, then separate responses may be more appropriate.

#### VIII. What is the deadline for response?

Responses to this survey are requested by 31 May 2022. Additional response time is available for those organizations desiring to participate but not able to meet the deadline for response. Please contact Fiona Gore, (+41 22 791 1619, <a href="mailto:goref@who.int">goref@who.int</a>) to request additional time to respond to the survey.

#### IX. Where do I submit a response to the survey?

Completed survey forms may be returned via mail or email to:

Dr. Fiona Gore goref@who.int

UN-Water, Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS) Water, Sanitation, Hygiene and Health (WSH) unit
Department of Environment, Climate Change and Health (ECH)
World Health Organization (WHO)
1211 Geneva 27, Switzerland

and via email to: glaas@who.int

:	r, including country-based staff) ir inancial assistance. If available, pl programmes or projects.  WASH-related

<sup>&</sup>lt;sup>5</sup> Programme budget includes the WASH and/or sanitation-specific operating budgets for labor, health and welfare benefits, payroll taxes, retirement

system contributions, insurance premiums, supplies, rent, utilities, etc. as well as budgeted financial or technical assistance provided.

<sup>6</sup> Financial aid provided includes all external disbursements (grants, concessionary loans, non-concessionary loans, equity investments) for WASHrelated (or sanitation specific) projects or programmes to country governments, regional organizations, multi-lateral institutions, UN agencies, research organizations, non-governmental organizations, private companies, financial institutions, or other organizations with a primary intent to improve WASH-related (or sanitation-specific) services and/or access to these services.

# 4.1 Main Priorities for WASH

What are the main areas of global priority/focus of your WASH activities in the WASH or water sector? Please indicate level of priority for each area. Please use space in Question 4.2 and reference note column to provide references or examples of your organization's highest priority areas within sanitation.

# 6. Geographic Distribution of Aid/Technical Assistance

Please only complete the first and last column if your organization already reports disbursements to OECD-Creditor Reporting System.

Please indicate the expenditure for WASH aid activities by country and type of aid as well as provide a description of sanitation-related activities by country. If aid activities benefit a particular region(s) or is more global in nature, please indicate these in a separate line(s). Expenditures can be in the form of finance and/or technical assistance (monetized staff time or recipient benefits provided). Please indicate currency, units, and the year(s) of disbursement (if not 2021). Also, please provide brief text descriptions of <u>sanitation-related</u> aid activities for countries, where appropriate. If you need additional rows to answer this question, please attach a word document or excel file with the additional information.

# 14. Breakdown of Sanitation Disbursements/Technical Assistance If data are available, please estimate the breakdown of finance, technical assistance (monetized staff time or recipient benefits provided), and/or staff budget among urban/rural programmes (d-f), and service provision/system strengthening (g-k). Please include totals of all grants and loans (concessional and non-concessional), if applicable. Currency (e.g. USD, Euro) Units (e.g. millions, thousands) Disbursement (2021) (monetary amount or by Brief description of activity percentage of assistance) Total development aid for sanitation and hand hygiene (inclusive of grants and loans) Support for sanitation disaggregated by sub-sector demographic (categories intended to sum to 100% of sanitation assistance) d. Urban areas Rural areas e. f. Both urban and rural areas Support for sanitation disaggregated by output/objective (categories intended to sum to 100% of sanitation assistance) Increasing access/new services Improving existing services to higher service levels h. i. Sustaining existing services Strengthening sector systems/capacity<sup>1</sup> j.

k.

Other (please specify):

<sup>1.</sup> Strengthening of sector systems for planning, financing, procurement, monitoring, post-construction support, education and training, technical assistance, etc.

# 15. Technical/Financial Assistance by Sanitation or Hand Hygiene Programme Area

If data are available, please estimate the breakdown of finance, technical assistance (monetized staff time or recipient benefits provided) in specific sanitation programme areas and provide a brief description of activities within each programme area for the 2021 period (or alternative period if easier to report).

a.	Currency (e.g. USD, Euro)		
b.	Units (e.g. millions, thousands)		
c.	Time period (if not 2021)		
		Disbursement (2021)	Brief description of activity
Hand	hygiene and behavior change		
d.	Hand hygiene – Activities related to provision of hygiene specific services, infrastructure, facilities, and/or handwashing promotion.		
e.	Elimination of open defecation/sanitation behavior change		
f.	Other (please specify):		
Sanita	tion service chain		
g.	Toilets – Activities related to the design, construction, management, use, acceptability of toilets		
h.	Containment, storage, treatment – Activities related to the planning, design, construction, management of on-site systems		
i.	Conveyance – Activities related to worker health and safety, latrine emptying/transport, sewer design, construction, maintenance, etc.		
j.	Treatment – Activities to support the design, construction, upgrade, or maintenance of liquid and solid waste treatment facilities		
k.	End use/disposal - Activities to support use of treated wastewater and faecal sludge (i.e. irrigation, fertilizer, energy production)		

# 15. Technical/Financial Assistance by Sanitation or Hand Hygiene Programme Area (continued)

If data are available, please estimate the breakdown of finance, technical assistance (monetized staff time or recipient benefits provided) in specific sanitation programme areas and provide a brief description of activities within each programme area for the 2021 period (or alternative period if easier to report).

		Disbursement (2021)	Brief description of activity
Sanita	tion specific programming or initiatives		
l.	Strengthening sanitation sector governance		
m.	Strengthening sanitation regulations		
n.	Developing national monitoring systems for sanitation		
0.	Supporting education and training/capacity development in sanitation		
p.	Strengthening sanitation sector finance		
q.	Affordability mechanisms for sanitation		
r.	Building markets/demand for sanitation products and services		
S.	Addressing gender and sanitation		
t.	Supporting research on sanitation		
u.	Supporting faecal sludge management		
v.	Promoting/supporting city-wide inclusive sanitation		
W.	Other (please specify):		

16.	16. Leveraging/Catalyzing Sanitation Development Aid						
		Yes	No	NA			
a.	Has your organization leveraged or catalyzed its development aid to encourage increased						
	financing/funding for sanitation by national governments, other ESAs or the private sector?						
	If you who so list in which according and another two according of according law and in plants with	- f:	1				
b.	If yes, please list in which countries, and one to two examples of successful leveraging/catalyzin	g for sanitat	ion.				
c.	If yes, please provide the amount (or estimated amount) of leveraged/catalyzed sanitation finan	ncing/fundin	g.				

17. Achievements		
	Sanitation	Hand hygiene
a. Please provide an overall summary assessment of the achievements of your organization's sanitation and hand hygiene programmes (e.g. from 2017-2021, over 10 million people were provided with new sanitation services).		
b. Please provide one to two		
examples of your organization's sanitation and hand hygiene projects/programmes that were considered by your organization to be successful over the past two years and what was learned.		

Please briefly describe any plans your organization has for changes in the type of sanitation, hand hygiene or general WASH aid you will provide between 2022 and 2025 (e.g. increase or decrease in support, new targets, revised policies, changes to priority countries /regions, new approaches, etc.).
