Mapping the application of Artificial Intelligence in Traditional Medicine

Technical brief

Sameer Pujari

Lead / AI and Digital Frontiers in Health Team Department of Digital Health and Innovation (DHI)

WHO-ITU Al4Health focus group Al benchmarking for all

- Established in **2018** as **a joint focus group** between **ITU** and **WHO** and 100+ experts and researchers.
- Brought together specialists to develop a **benchmarking framework** for **international policies** and standards.

LAYING DOWN THE FOUNDATION OF THE WORK ON AI & TRADITIONAL MEDICINE

Dr. Vaidya Rajesh Kotecha, Secretary, Ayush gave a presentation on "*Role of Artificial Intelligence in Traditional Medicine and Digital Initiative of Ayush*" during the WHO-ITU Focus Group meeting on Artificial Intelligence for Health (FG-AI4H) meeting held in Helsinki, Finland.

Global Initiative on Al for Health (GI-AI4H)

Enable

Standards, governance, policies, and guidance on evidence-based AI4H

Facilitate

Pooled
Investments &
a global
community of
experts

Implement

Sustainable models of Al ecosystem at the country level

Ribbon cutting of the Global initiative on Al for Health at Al for good summit on 6 July 2023

(L-R: Ms. Doreen Bogdan-Martin (SG ITU), Dr. Tedros Adhanom Ghebreyesus (DG WHO), Mr. Edward Kwakwa (ADG WIPO)

Enable policies, standards, guidance on AI for health

Ethics and Governance of Artificial Intelligence for Health

Generating Evidence for Artificial Intelligence-based Medical Devices

Regulatory Considerations on Artificial Intelligence for Health

Ethics and Governance of Al for Health: Large Multi-Modal Models

WHO Online introductory course on Ethics and governance of AI for health

Publications on AI across different facets of Health

Policy briefs on the use of AI in health

Workbook on the Global Initiative on AI for Health

- Systematizing the lived experiences of attendees onsite and online during the GI-AI4H.
- Aiming to build a standard of reporting strategic events and workshops.

Policy, science and technical papers

The journey

Hand-by-hand in continuous technical collaboration

Milestone 1 (2018-2023)

 Collaboration under the WHO-ITU Focus Group on AI for Health and the Topic Group – Traditional Medicine (TG-TM)

Milestone 3 (2024)

 Strategic planning meeting of the traditional Medicine Unit and the Global Traditional Medicine Centre (GTMC) with participation of DHI/AI Team

Milestone 5

 Mapping the Application of Al in TM: technical brief (coming soon!)

Milestone 2 (2023)

 WHO Traditional Medicine Global Summit in Jamnagar with participation of DHI/AI Team

Milestone 4 (2024)

 Global Technical meeting: Al for Global Health. Advancing TM in New Delhi and the WHO Global TM Library

The journey

Hand-by-hand in continuous technical collaboration: outcomes

Milestone 1

(2018-2023)

Benchmarking of AI in TM (preliminary results)

First literature mapping: 86 resources

Milestone 3

(2024)

Co-development of flagship policy products

First public iteration of the Mapping technical brief document

Milestone 5

(2024)

Potential actions from this mapping relevant for all stakeholders in TM

Milestone 2

(2023)

Jamnagar declaration with inputs from DHI/AI Team

First literature mapping: 66 resources

Milestone 4

Global Technical meeting: Artificial Intelligence (AI) for Global Health: Advancing TM

Purpose

Addressing the increasingly value and relevance of AI in health care and leveraging its potential to benefit TM

- 1 Address the rapidly evolving Al landscape and its use in TM
- 2 Showcase global, regional and Member State examples on how Al is being used in TM
- Highlight risks, challenges, opportunities and gaps for evidence-informed decision-making and policy-making
- 4 Identify potential actions for effective and responsible integration of AI into TM

Intended users

Four groups specifically crafted for AI in TM

Policymakers and government

TM practitioners and users

Digital technology experts

Health systems and technical experts

Credits: Thanga Vignesh

Identifying approaches to integrate and implement AI systems

Explore and access to information, and engage in active participation in AI

Exploring, designing and developing AI systems & medical devices

Deploy and use such medical devices and Al systems

Topics and themes

Two exercises mapping covering more than 150+ literature documents

Medical	Technological	ТМ	
AI in health care for TM	Global perspectives on ICT and Al in TM	Ethical considerations to indigenous knowledges	
ICT/Al in drug discovery for TM	Ethical considerations for AI in health and TM	IP rights	
Al in TM diagnostics	Digitalization ot traditional knowledge (indigenous medical systems)	Reusable knowledge bases for TM	
Electronic health records and standards in TM	Technological	Prakriti assessment and personality analysis for Ayurgenomics	
AI in TM-specific supply chain management	Al and digitalization policy agendas (global, regional, country)		
	Risk identification & management, Al lifecycle		

Current uses and cases of AI in TM

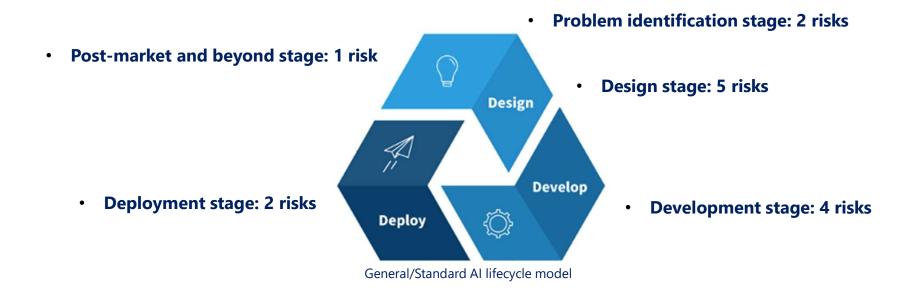

Domain	Topic	Cases
In healthcare	Diagnosis and prediction-based diagnosis	2 cases
In clinical care	AI-based clinical decision support systems	1 case
In health research and drug development	 Pattern recognition Genetic information analysis Identification and direct utilization of TM plants 	4 cases
In health systems management	Utilizing hospital management information systems	3 cases
Preserving and advancing TM knowledge	 Online repositories for TM knowledge Databases for protection against biopiracy Conservation and identification of biodiversity 	3 cases
In policymaking for TM	 Data governance models Agreements between national entities and Indigenous Communities in data advancement 	5 cases
Domains of interest where no evidence was found	Docking-simulation studiesPathway identificationArtificial chemical sensors	

Risks and challenges in the application of AI in TM

8 overarching risks

- Ethics & Governance of Artificial Intelligence for Health
- Regulatory Considerations on Al for Health
- TM strategic documents and agendas

Set of risks throughout the Al lifecycle and beyond

Next steps

- Governance: Guidance on Artificial Intelligence and Intellectual Property with Traditional Medicine as a use case
- 2 Knowledge: Global Library on Al and Traditional Medicine
- Health work-force: Training modules for health workers and end users
- 4 Global community of practice
- 5 Implementation support
