Belarus

Strengthening vaccine distribution and administration capacities

- Immunization data collection and monitoring systems improved through procurement of 2 servers for immunization data collection and monitoring by national and subnational immunization teams
- Procured for optimal vaccine storage and temperature monitoring

Ensuring a rapid and safe deployment of COVID-19 vaccines

- National recommendations and information on COVID-19 vaccination regularly updated and disseminated online
- New COVID-19 information portal developed with Gomel State Medical University launched

Information communication campaigns developed and shared also on official health authorities’ channels, contributing to increased awareness and confidence in COVID-19 vaccination

Reducing health inequities and supporting the uptake of vaccines

- Awareness-raising campaign “Vaccines Work” conducted in partnership with the Gomel State Medical University to promote vaccination against COVID-19
- 315 people, including 150 students, reached with awareness-raising activities

Increasing health-care workers’ knowledge and skills

- 100 health-care workers (HCWs) from hygiene and epidemiology centres across the country participated in trainings on infodemic management
- 5000 views of COVID-19 vaccines webinar registered; recording of webinar distributed to HCWs

- 200 media representatives and agency spokespersons from across the country instructed on the role of media in communicating about COVID-19 vaccines

Vaccination coverage rates

- Diphtheria, tetanus, pertussis-containing vaccine, 3rd dose: 98% (2022)
- COVID-19 complete vaccination series: 66.4% (03 September 2023)
- COVID-19 1st booster dose: 59.7%

Collaboration set up with NGO to support activities to increase vaccination coverage against COVID-19 among people who use drugs and people living with HIV

Awareness-raising campaign “Vaccines Work” conducted in partnership with the Gomel State Medical University to promote vaccination against COVID-19

20 specialists working with NGOs from across the country trained on communicating about COVID-19 vaccines

- 75 units of combined refrigerator and freezers
- 56 thermometers
- 7 temperature recording devices

Vaccination saves lives: supporting the deployment of COVID-19 vaccines and routine vaccination systems in the Eastern Partnership

A 3-year, €40 million project of the European Union and WHO Regional Office for Europe in six countries of the Eastern Partnership – Armenia, Azerbaijan, Belarus, Georgia, the Republic of Moldova, and Ukraine

Project impact: February 2021–November 2023
