

UNK Written statement for item on Governance and leadership of WHO EURO

The UK welcomes the Accountability Report and the improvements made to readability and accessibility. We value this document for illuminating how WHO EURO achieves outcomes. The report is a great example of improving transparency across WHO and we'd like to thank the Regional Director for his commitment to it.

We also welcome the efforts of the SCRC sub-group on Governance to further refine the report including strengthening the key performance indicators and support the new KPIs. The UK is committed to continue working with you to see the document meet its full potential.

Finally - we support the full implementation of the 2023 Governance Review and would again like to thank the SCRC sub-group on Governance for its efforts to improve processes for WHO governing body nominations. We encourage the 32nd SCRC to carry on this good work as well as to consider opportunities to further increase the visibility of the committee. Improvements to SCRC outreach and transparency are vital and their proposed role in representing non-members is a potential model for a reformed EB.
